Dear Mr. Brown:

On July 11, 2007, Trevor Irwin, representing Ohio EPA Southeast District Office, conducted an inspection of the Brown Brothers Landfill. The findings and observations of this inspection are as follows:

Cover vegetation continues to grow throughout the facility. Several small trees are growing on the eastern slope of the facility. The presence of these trees could possibly contribute to the infiltration of surface water into the landfill which would produce more leachate.

Several areas on the southeastern slope of the landfill show evidence of leachate outbreaks. These areas also have the presence of cattails growing in the vicinity of the leachate outbreaks.

In addition, I also observed that no method to limit access to the facility has been installed.

Sincerely,

Trevor L. Irwin, R.S.
