**RE: NOBLE COUNTY
FAC- CROCK C&DD**

Mr. Ed Crock
Crock C&DD Landfill
17990 State Route 78
Caldwell, Ohio 43724

Dear Mr. Crock:

On May 12 and 26, 2011, I conducted inspections of the Crock C&D Landfill. I was accompanied by Mark Mansfield of this office during my May 12 inspection. During each inspection, I also observed conditions of the nearby area where you have continued to receive waste and have amassed a significant amount of mixed waste.

During my May 12 inspection, Mark Mansfield obtained GPS information regarding your offsite staging area. Based on the readings he obtained, a map was developed delineating this area. I have included a copy of this map in this correspondence.

Bill Baker was sorting material from the mixed waste pile during both inspections. Solid waste was being placed in a rolloff box as it was encountered. Material was placed on the portable screen and hand raked to separate the fines. There was a pile of mulch generated from the onsite tub grinder during my May 12 visit. There was none of this material present on May 26. Mr. Baker indicated that all mulch material is being transferred to your lumber store in Caldwell for sale. Fines and other material that collect under the screen appeared to be left in place or pushed back into the unsorted pile. Solid waste including mattresses, scrap tires, cardboard packaging, and one bag of household trash were observed in the unsorted waste pile.

Since ceasing active disposal operations at your C&DD landfill, you have continued to accept mixed loads of waste for your customer's disposal in the field adjacent to your landfill. Although you have advised me of your intentions to recycle the waste material, very little recyclable material has been recovered from the mixed waste pile. From your operations to date, it appears that you are only able to separate and recycle a small amount of wood waste into wood mulch. All of the other waste materials are being illegally disposed on your site.

The following violations were observed during these inspections:

OAC Rule 3745-27-05(C) - No person shall conduct, permit, or allow open dumping.

**NOBLE COUNTY
FAC- CROCK C&DD
PAGE 2**

The waste that you have accepted and placed outside your licensed C&DD landfill contained cardboard, packaging, mattresses, tires, and other solid waste. In addition, the fines which are separated from the woodwaste at the screen are not recovered for proper disposal or processed into a marketable product. The observed deposition of the solid waste constitutes open dumping.

OAC 3745-400-04(B) - No person shall conduct or allow illegal disposal of construction and demolition debris, as defined in rule 3745-400-01 of the Administrative Code.

The deposition of the C&DD and solid waste outside your licensed facility and the material you have removed from your landfill and placed outside the boundary of your licensed facility constitutes illegal disposal of C&DD.

As stated above, a significant amount of waste has been disposed outside your facility. All of this waste must be removed for legitimate disposal in a licensed landfill or legitimately recycled. To date, the only material that has been processed and prepared to be marketed is the clean wood waste separated from the unsorted waste pile. Material such as shingles, vinyl siding, drywall and plywood has not been recycled in any manner. In addition, the fines which are separated from the woodwaste at the screen are not recovered for proper disposal or processed into a marketable product. The separated fine material must be managed as a solid waste.

Please respond within 15 days detailing your actions to abate the above cited violations. As originally requested in correspondence dated October 12, 2010, please provide a list of actual customers, and copies of records verifying the types, dates, and amounts of material received and removed for disposal or as a commodity. Please also list the disposal locations or customers purchasing the material. Please feel free to contact me at (740) 380-5219 if you have any questions.

Sincerely,

Peter C. Thompson
Division of Materials and Waste Management
