RE: Documentation of March 31, 2008, site visit

Dear Mr. Fello:

On March 31, 2008, I conducted a site visit at the Suburban Landfill, Inc. owned and operated by Waste Management of Ohio. During the site visit, I viewed the waste disposal operations, leachate collection facilities and walked all slopes checking the integrity of the leachate clean out risers and gas wells. While walking the slopes, I observed leachate outbreaks on the northern, southern and west sides of the facility. The following violation of the Ohio Administrative Code (OAC) was observed at the time of my visit.

**VIOLATION**

- 1) OAC 3745-27-19(K)(1)(a) requires an owner/operator to contain or control leachate outbreaks when they occur. At the time of my visit, I observed leachate outbreaks on both the northern, southern and western slopes. The outbreaks on the southern and western slopes were entering the surface water control ditch and were meandering out of the lined area. This is a violation of the aforementioned OAC rule. Please repair and contain the leachate outbreaks in these areas and provide a written response to Ohio EPA detailing the steps taken to contain and repair the outbreaks.

Please feel free to contact me at (740) 380-5435 if you have any questions or I can be of any assistance.

Sincerely,

Dale W. Warner, R.S.  
Environmental Specialist  
Division of Solid and Infectious Waste Management
