Mr. Pat Bastidas
Style Crest Enterprises Inc.
600 Hagerty Drive
Drawer A
Fremont, Ohio 43420

Dear Mr. Bastidas:

Thank you for accompanying me during Ohio EPA's September 23, 2008, inspection of Style Crest Enterprises Inc.'s (Style Crest Enterprises) facilities located at 600 Hagerty Drive, 605 Hagerty Drive and 730 Hagerty Drive in Fremont Ohio. I inspected Style Crest Enterprises to determine its compliance with Ohio's hazardous waste laws as found in Chapter 3734. of the Ohio Revised Code (ORC) and Chapter 3745. of the Ohio Administrative Code (OAC).

Style Crest Enterprises manufactures vinyl siding, vinyl soffit, vinyl mobile home skirting, and metal mobile home tie downs at 600 Hagerty Drive. D001/D035 spent solvent is generated in the vinyl manufacturing process from the cleaning of ink jet printer lines used to mark the vinyl products with manufacturing codes. The spent solvent is accumulated in five gallon containers and a fifty-five gallon container located in the manufacturing area. Style Crest Enterprises also generates large quantities of vinyl scrap which is nearly 100 percent recycled on-site back into vinyl products. Used oil is generated in the vinyl manufacturing process from the changing of fluids in the extrusion machines and fork lifts. The used oil is stored in an above ground tank marked with the words "used oil". Spent lead acid batteries used in fork lifts and universal waste spent fluorescent bulbs used for lighting are also stored at this location. However, no bulbs or spent lead acid batteries were in storage at the time of this inspection. Spent fluorescent bulbs and spent lead acid batteries are re sent off-site for recycling.

Style Crest Enterprises manufactures aluminum railings and fiberglass resin steps applied to wooden frames at 730 Hagerty Drive. D001/F003 spent solvent/resin is generated in the fiberglass resin application process from the cleaning of the fiberglass resin and/or gel coat application guns and is accumulated in a fifty-five gallon drum in this manufacturing area. The hazardous waste storage area is located in a storage shed at this address. However, no hazardous waste was in storage at the time of this inspection.

Style Crest Enterprises distributes many mobile home parts including appliances from 605 Hagerty Drive. Style Crest Enterprises does not generate any hazardous wastes at this location as this is primarily a distribution warehouse.

The 600, 605 and 730 Hagerty Drive properties are contiguous. Style Crest Enterprises is considered a small quantity generator of hazardous waste.

Style Crest Enterprises operates several other distribution and warehousing centers located in Fremont, Ohio which were not visited during this inspection.

I found the following violation of Ohio's hazardous waste laws during the inspection. However, Style Crest Enterprises corrected the violation later in the day and e-mailed a photograph demonstrating abatement of the violation to Ohio EPA on September 24, 2008.

1. **OAC Rule 3745-52-34(C)(1)(b), Container Marking:** A generator may accumulate as much as 55 gallons of hazardous waste at or near the point of generation provided that the container is marked with the words "Hazardous Waste" or other words that identify the contents of the container.

Style Crest Enterprises failed to mark the satellite container used to accumulate spent resin/solvent in the Step Shop fiberglass coating shop located at 730 Hagerty Drive. Style Crest Enterprises labeled the container "Satellite accumulation, hazardous waste resin and acetone, flammable liquid" after the completion of the inspection and e-mailed a photograph of the marked container to Ohio EPA on September 24, 2008. Therefore, this violation is abated and requires no further action.

As we discussed during the inspection, you may be able to reduce the waste your company generates. If you find ways to recycle, reduce or eliminate the amount of waste that your company generates you may be able to reduce treatment and disposal costs as well as regulatory requirements.

	c.	Is a copy of the reclamation agreement kept on-site for at least three years after termination/expiration of the agreement?	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input checked="" type="checkbox"/>
NOTE: If wastes are reclaimed under a contractual agreement and an answer to questions 10(a) through 10(c) is no, the generator is in violation of 3745-52-20 (A) (B) & (D), 3745-52-22 and 3745-52-23. Even if the waste is being reclaimed under agreement, LDRs still apply. Complete LDR checklist.

NOTE: Remind the generator that the certification statement they signed indicates: 1) they have properly prepared the shipment for transportation and 2) they have made a good faith effort to minimize their waste generation.			
15.		If the generator did not receive a return copy of each completed manifest within 60 days of being accepted by the transporter did the generator submit to Ohio EPA, a copy of the manifest with some indication that the generator has not received confirmation of delivery? NOTE: Waste generated at one location and transported along a publicly accessible road for temporary consolidated storage or treatment on a contiguous property also owned by the same person is not considered "on-site" and manifesting and transporter requirements must be met. To transport "along" a public right-of-way the destination facility has to act as a transfer facility or have a permit because this is considered to be "off-site."
