Baltimore, OH 43105

**Re: Walnut C&DD Facility / Fairfield County**

Dear Mr. Mock:

This letter is written regarding the storm water inspection I conducted of the construction activities at Walnut C&DD, located at 8675 Lancaster-Newark Road, on September 26, 2011. I understand this site is currently covered under the General Storm Water Permit Associated with Construction Activities. Based on my site inspection and the conditions set forth in the General Permit, the following was noted:

**Sediment and Erosion Controls:**

The site was mostly stabilized, however there was a small turbid discharge that was leaving the site at the front entrance. It was noted that the existing check dams consisting of silt fence and straw bales needed to be maintained. Additional controls may need to be installed to prevent the turbid discharge. Please see attached pictures.

If you have any questions regarding this letter or my inspection, please do not hesitate to call me at our Central District Office at (614) 728-3851.

Sincerely,

Gregory L. Sanders  
Environmental Specialist
