**Re: Storm Water Inspection at Polyflex Division/ Franklin County
Permit Number: 4GR00047*DG**

Dear Mr. Moore:

This letter is written in follow-up to a preliminary industrial storm water I conducted at Polyflex Division located at 2400 Marilyn Park Lane in Columbus, Ohio on August 24, 2011. The purpose of the preliminary inspection was to evaluate compliance with your General Storm Water Permit Associated with Industrial Activities. Based on the conditions of the permit and the preliminary inspection the following observations were noted:

Storm Water Pollution Prevention Plan (SWPPP)

- Please understand a site specific SWPPP is required for all industrial sites covered under the General Storm Water Permit. The SWPPP must address all materials and processes exposed to storm water and the associated best management practices (BMPs) to minimize storm water contamination. The SWPPP must be maintained on site and available for review. Please submit to my attention an electronic copy of the SWPPP for further review and comment.

Site Observations

- During the inspection, I noted areas where it appeared materials were stored outside and exposed to storm water. It appeared these large vessels were appropriately stored and BMPs implemented to minimize the potential off site contamination.

At this time I am formally requesting an onsite inspection with you to further determine compliance with the General Storm Water Permit. Please contact me at your earliest convenience at (614) 728-3844.

Sincerely,

Harry Kallipolitis
Storm Water Coordinator
Division of Surface Water
Central District Office
