Mr. James Distel, Service Manager  
Reineke's Tiffin Ford Lincoln Mercury  
2020 West State Route 18  
Tiffin, Ohio 44883

Dear Mr. Distel:

Thank you for accompanying me during Ohio EPA's July 15, 2010, inspection of Reineke's Tiffin Ford Lincoln Mercury located at 2020 West State Route 18, Tiffin, Ohio. I inspected Reineke's Tiffin Ford Lincoln Mercury to determine its compliance with Ohio's hazardous waste laws as found in Chapter 3734. of the Ohio Revised Code (ORC) and Chapter 3745. of the Ohio Administrative Code (OAC). My inspection included a review of company operations and written documentation. During the inspection I also helped you identify ways to prevent pollution by reducing waste.

Reineke's Tiffin Ford Lincoln Mercury is a full service automotive dealership which operates a service shop at the 2020 West State Route 18 location. Facility records reviewed during this inspection indicate that Reineke's Tiffin Ford Lincoln Mercury generates spent solvent in one parts washer located in the service shop. The spent solvent is managed as D001 ignitable characteristic hazardous waste. Approximately 15 gallons of spent solvent is generated every three months. Reineke's Tiffin Ford Lincoln Mercury also generates spent lead acid automotive batteries that are exchanged with new batteries by a battery wholesaler, used oil which is burned on-site in a used oil burner located in the service department or shipped off-site for recycling, used oil filters which are hot drained and crushed before disposal as solid waste, used anti-freeze/coolant which is sent off-site for recycling and used automotive tires which are sent off-site for shredding. Lastly, Reineke's Tiffin Ford Lincoln Mercury generates spent fluorescent lighting which, up to this point has been managed as solid waste but will be managed as universal waste in the future.

Reineke's Tiffin Ford Lincoln Mercury is operating as a conditionally exempt small quantity generator of hazardous waste, a used oil generator and a small quantity universal waste handler.

I found the following violation of Ohio's hazardous waste laws during this inspection.

1. **OAC Rule 3745-52-11, Hazardous Waste Determination:** "Any person who generates a waste, as defined in rule 3745-51-02 of the Administrative Code, must determine if that waste is a hazardous waste..."

Mr. James Distel, Service Manager  
July 29, 2010  
Page 2

Reineke's Tiffin Ford Lincoln Mercury failed to evaluate the spent fluorescent lamps used throughout the facility to determine if they are hazardous waste. Reineke's Tiffin Ford Lincoln Mercury currently manages the spent lamps as solid waste and disposes of the spent lamps in a solid waste dumpster.

Reineke's Tiffin Ford Lincoln Mercury must immediately cease disposing of the spent lamps as non-hazardous waste until a proper waste evaluation has been completed. The spent lamps typically contain mercury and other heavy metals which could make them a hazardous waste.

Reineke's Tiffin Ford Lincoln Mercury has the option of handling spent lamps as hazardous waste or as universal waste. Managing hazardous waste lamps under the universal waste rules eases certain regulations imposed on generators of spent fluorescent lamps.

**On July 20, 2010, I received an e-mail from you indicating that Reineke's Tiffin Ford Lincoln Mercury has begun a program to collect spent fluorescent lamps for recycling as a universal waste. Therefore, this violation has been abated.**

Please be advised that spent fluorescent lamps must be stored in a closed and labeled container. This container must be properly labeled with the wording "**Universal Waste Lamp(s)**", "**Waste Lamp(s)**", or "**Used Lamp(s)**". Reineke's Tiffin Ford Lincoln Mercury must also track the accumulation of the spent lamps to ensure spent lamps are **not stored for greater than 365 days**. This can be accomplished with recycling receipts or by marking the container with the accumulation start date (the day the first spent lamp is placed in the container).

No spent lamps were in storage at the time of the inspection.

Ohio EPA recommends that spent lamps be managed as a universal waste and recycled.

I provided Reineke's Tiffin Ford Lincoln Mercury with the following fact sheets at the time of the inspection: Universal Waste Rules for Handlers of Lamps, dated June 2005; Fluorescent Lamps: What You Should Know, dated January 2007; and Computer, Fluorescent Lamp and Ballast Recyclers, dated April 2008.

As we discussed during the inspection, you may be able to reduce the waste your company generates. If you find ways to recycle, reduce or eliminate the amount of waste that your company generates you may be able to reduce treatment and disposal costs as well as regulatory requirements. During the inspection, I observed potential P2 opportunities associated with your operation(s). **P2 options that you may want to evaluate for this operation include sending your spent used oil filters off-site for recycling of the metal content and substituting water based or microbial cleaners for your mineral spirits based parts washer solvent.**

**Comments:**  
**Tiffin Ford does not have a facility hazardous waste identification number. The facility currently generates used oil and spent fluorescent lamps. The used oil is burned on site or recycled and the lamps are managed as solid waste. The facility intends to manage the spent lamps as universal waste.**
