Hazardous Waste
Notice of Violation/Return to Compliance

November 14, 2011

Mr. John Kelley
Bob Kelley Chevrolet-Buick-Geo
138 South Main Street
North Baltimore, Ohio 45872

Dear Mr. Kelley:

On November 4, 2011, I conducted a compliance evaluation inspection of Bob Kelley Chevrolet-Buick-Geo (Bob Kelley CBG) located at 138 South Main Street in North Baltimore, Ohio. I inspected Bob Kelley CBG to determine its compliance with Ohio's hazardous waste laws as found in Chapter 3734 of the Ohio Revised Code (ORC) and Chapter 3745 of the Ohio Administrative Code (OAC). Pollution prevention options were also discussed during this inspection. This letter will explain the violation I found and your compliance with respect to it.

During my visit I spoke with you, and Mr. Larry Todd, observed your operations and reviewed applicable paperwork. Bob Kelley CBG is a full service dealership. Used oil is generated and stored in a 1,000-gallon storage tank located in the shop area. Bob Kelley CBG burns the used oil they generate in an on-site furnace. Used oil filters are hot drained and managed as solid waste. Bob Kelley CBG has one 20-gallon parts washer (D001) in the maintenance area that is serviced by Vesco Oil four times a year. Bob Kelley CBG does body work and limited painting. Bob Kelley CBG generates approximately 15 gallons of spent paint waste solvent (D001, D018, D035, D039, F003, F005) every six months which is picked up by Safety Kleen.

At the time of my investigation, Bob Kelley CBG was not generating any fluorescent bulbs. Bob Kelley CBG is in the process of arranging for the spent fluorescent bulbs to be picked up for recycling when generated. Bob Kelley CBG plans to manage the spent fluorescent lamps as universal waste. A copy of [Fluorescent Lamps: What You Should Know](#), was given to you at the time of my investigation. I recommend that you review this document and contact me if you have any questions regarding the proper management of spent fluorescent bulbs.

At the time of my inspection, Bob Kelley CBG was operating as a conditionally exempt small quantity generator of hazardous waste.

I found the following violation of Ohio's hazardous waste laws.

1. OAC Rule 3745-279-22(C)(1): Labeling:

Containers, aboveground tanks, and fill pipes used for underground storage tanks shall be labeled or marked clearly with the words "used oil."

Bob Kelley CBG had two portable carboys, three 55-gallon drums and one 1,000-gallon storage tank of used oil that were not properly labeled.

At the time of my inspection, Bob Kelley CBG properly labeled the carboys, drums, and storage tank with the words "used oil". A copy of the fact sheet, The Regulation of Used Oil: An Overview for Ohio Businesses Who Generate Used Oil, was given to you at the time of my inspection. Please review this information and contact me if you have any questions.

Therefore, this violation is considered abated.

Ohio EPA has helpful information about compliance assistance and pollution prevention at the following web address: <http://www.epa.ohio.gov/ocapp>. In addition, you can find copies of the rules and other information on the division's web page at: <http://www.epa.ohio.gov/dhwm/>.

Free and confidential on-site compliance assessments are one of the services the Office of Compliance Assistance and Pollution Prevention (OCAPP) offers to small business owners (100 employees or less). A small business owner can call the OCAPP at (800) 329-7518 or (614) 644-3469 to get more information about the process or to request a compliance assessment. The Northwest District Office (Bowling Green) OCAPP contact is Ron Nabors, 419-373-3147.

Enclosed you will find a copy of the checklists that were completed during the inspection. In addition, a list of facilities that recycle used oil filters is enclosed. The Ohio EPA encourages you to consider recycling the used oil filters as scrap metal in lieu of managing them as solid waste.

If you have any questions or I can be of assistance, please contact me at (419) 373-3066.

Sincerely,

Melissa L. Boyers
