Procex, Ltd.
880 Cherry St.
Kent, Ohio 44240

Dear Mr. Hamlin:

On November 16 and 17, 2011, I received additional information from you responding to my November 9, 2011 letter. The information submitted included your description of how you are now managing hazardous waste in the satellite area by the salt bath, a facility map showing two < 90 day hazardous waste storage areas and a partial LDR form for your salt bath sludge from Chemtron. I called Brett Myers with Chemtron, and on November 22, 2011, received a complete LDR form for your salt bath sludge. Please note, this complete form should be kept readily accessible in your files to document in the future that your company is in compliance with the land disposal restriction rules, specifically OAC 3745-270-07(A)(2). A copy is enclosed.

Ohio EPA now considers your facility to have adequately addressed all of the violations cited as a result of my March 29, 2011 inspection. Should you have any questions related to this letter, please feel free to call me at (330) 963-1226.

Sincerely,

Sherry K. Slone, P.E.
District Engineer
Division of Materials and Waste Management
