Dear Ms. Hartman:

On December 16, 2008, this office conducted an inspection of the wastewater treatment plant serving the above referenced facility. Present during the inspection were this writer and Kraig Bucklew of the Holmes County Health Department.

At the time of the inspection, the treatment plant was producing an unsatisfactory effluent.

The mixed liquor in the aeration tank had a grey color and a septic odor was present. The contents of the clarifier consisted of septic wastewater. The surface sand filter beds were flooded and the contents of the chlorine contact tank were also septic.

A review of your Discharge Monitoring Reports (DMRs) covering the period September 2007 through October 2008 revealed the following effluent violations:
