**NOTICE OF VIOLATION – ACTION REQUIRED**

November 19, 2008

CERTIFIED MAIL

L.E.A.D.S  
Buckeye Lake Head Start  
159 Wilson Street,  
Newark, OH 43055

Licking County  
Buckeye Lake Head Start  
Non Transient Non Community PWS  
PWS ID: OH4557212

**Subject: Violation of Maximum Contaminant Level for TOTAL TRIHALOMETHANES (TTHM)**

Buckeye Lake Head Start is in violation for exceeding the maximum contaminant level (MCL) standard of 0.080 MG/L as established in the Ohio Administrative Code (OAC) section 3745-81-12 for TOTAL TRIHALOMETHANES (TTHM). Compliance with the MCL is based on a running annual average. The annual average for TOTAL TRIHALOMETHANES (TTHM) during the Third Quarter of 2008 time period is 0.093 MG/L.

**To address the MCL violation, Buckeye Lake Head Start is required to take the following actions:**

- Notify your customers within 30 days using the enclosed instructions and public notice.
- Complete and send a verification form with a copy of the public notice to the above mailing address within ten days after issuance.
- Perform quarterly monitoring for TOTAL TRIHALOMETHANES (TTHM) during each calendar quarter (January 1 – March 31; April 1 – June 30; July 1 – September 30; October 1 to December 31).
- Consult with your Ohio EPA district representative to discuss your options for coming into compliance and establishing a compliance schedule or comply with any existing enforcement action that has been issued to you.

Your prompt attention to this matter is greatly appreciated. Continued noncompliance may lead to enforcement actions. If you have any questions or wish to change the public notice, please call me at (614) 644-2752.

Sincerely,

Sarah Byerly

# DRINKING WATER NOTICE

## Buckeye Lake Head Start Has Levels of TOTAL TRIHALOMETHANES (TTHM) Above Drinking Water Standards

Our water system recently violated the maximum contaminant level (MCL) for TOTAL TRIHALOMETHANES (TTHM). The average level of TOTAL TRIHALOMETHANES (TTHM) over the last four quarters was 0.093 MG/L. The standard for TOTAL TRIHALOMETHANES (TTHM) is 0.080 MG/L.

### What should I do?

- **You do not need to use an alternative (e.g., bottled) water supply.** However, if you have specific health concerns, consult your doctor.

### What does this mean?

The levels detected do not pose an immediate risk to your health. However, some people who drink water containing TOTAL TRIHALOMETHANES (TTHM) in excess of the MCL over many years may experience problems with their liver, kidneys, or central nervous systems, and may have an increased risk of getting cancer.

### What is being done?

We are investigating and taking the necessary steps to correct the problem as soon as possible.
