**Arsenic Maximum Contaminant Level (MCL) Exceedance**

Dear Public Water System Owner:

This letter is notification that JONATHAN ALDER JUNIOR HIGH SCHOOL is in violation for exceeding the maximum contaminant level (MCL) standard for arsenic of .010 mg/L as established in the Ohio Administrative Code (OAC) section 3745-81-11. Compliance with the arsenic MCL is based on a running annual average. The annual average for arsenic for the April 1 to June 30, 2007 time period is 0.018 mg/L.

To address the MCL violation the JONATHAN ALDER JUNIOR HIGH SCHOOL is required to take the following actions:

- 1) ISSUE PUBLIC NOTICE:  
Within thirty days, issue public notice according to the enclosed instructions. Complete and return the verification form along with a copy of the public notice to my attention at the letterhead address within ten days after it is issued. If arsenic levels continue to exceed the MCL, the public notification must be updated and repeated for each period that the arsenic MCL is exceeded. A verification form and copy of the public notice must be sent to Ohio EPA each time the notice is repeated. The enclosed draft public notice may be used verbatim. The mandatory health language for arsenic must appear in the public notice. If you wish to make any changes to this draft, telephone this office for verbal authorization prior to issuing the public notice.
- 2) CONTINUE TO SAMPLE FOR ARSENIC:  
Continue collecting one sample for arsenic analysis on a quarterly basis. Your next sample should be collected between July 1 and September 30, 2007.
- 3) WORK TO RESOLVE THE PROBLEM:  
Consult with your Ohio EPA district representative to discuss your options for coming into compliance and to establish a compliance schedule.

JONATHAN ALDER JUNIOR HIGH SCHOOL
