Hazardous Waste
Notice of Violation

December 3, 2009

Mr. Charlie Watson
Discount Lube, Inc.
6630 Centers Drive
Holland, Ohio 43528

Dear Mr. Watson:

On November 18, 2009, Wendy Miller and I conducted a compliance evaluation inspection at Discount Lube, Inc. (DLI) located at 6630 Centers Drive in Holland, Ohio. We inspected DLI to determine its compliance with Ohio's hazardous waste laws as found in Chapter 3734 of the Ohio Revised Code (ORC) and Chapter 3745 of the Ohio Administrative Code (OAC). Pollution prevention options were also discussed during this inspection.

During our visit, we spoke with you and observed the shop operations. DLI is an automotive oil change facility. DLI generates used oil and antifreeze. The used oil and antifreeze are stored in on-site tanks and are shipped off-site for recycling. Used oil filters are hot-drained and then shipped off-site for recycling. DLI also generates spent fluorescent lamps which are managed as solid waste. At the time of our inspection, DLI was operating as a non-generator of hazardous waste.

We found the following violation of Ohio's hazardous waste rules. In order to correct this violation you must do the following and send me the required information within 30 days of your receipt of this letter:

1. Waste Evaluation, OAC Rule 3745-52-11:

Any person who generates a waste must determine if that waste is a hazardous waste by using generator knowledge or by testing the waste.

DLI failed to have waste evaluation documentation or an established recycling plan in place for the fluorescent bulbs generated at the facility.

Hazardous bulbs are considered "spent materials" and remain hazardous waste even when recycled. Hazardous waste lamp generators have the option of handling their lamps as hazardous waste or as universal waste. Managing hazardous waste lamps under the universal waste rules eases certain regulations imposed on generators of spent lamps.

Page Two

Please be aware that incandescent, fluorescent, metal halide, neon, high-intensity discharge, high-pressure sodium and mercury-vapor lamps could be hazardous waste when discarded. Fluorescent lamps may contain up to 40 milligrams (mg) of mercury, depending on the brand and manufacturer. Lamps may also contain lead and cadmium. Many lamps exhibit a characteristic of toxicity for heavy metals when disposed. A copy of Fluorescent Lamps: What You Should Know, is enclosed. I recommend that you review this document and contact me if you have any questions.

DLI must submit to Ohio EPA documentation to demonstrate how you plan to properly manage your fluorescent bulbs. If DLI plans to manage the spent fluorescent bulbs when generated as universal waste, please submit the name of the facility where you plan to recycle the bulbs. DLI must also properly train employees, who handle or have responsibility for managing universal waste, on waste handling and emergency procedures relative to their responsibilities. Please review the universal waste requirements with the appropriate employees and send me documentation that this has been completed.

Ohio EPA has helpful information about compliance assistance and pollution prevention at the following web address: <http://www.epa.ohio.gov/ocapp>. In addition, you can find copies of the rules and other information on the division's web page at: <http://www.epa.ohio.gov/dhwm/>.

Enclosed you will find a copy of the checklists that were completed during the inspection.

Should you have any questions or if I can be of assistance, please contact me at (419) 373-3066.

Sincerely,

Melissa L. Boyers

Waste Codes for Federally Regulated Hazardous Wastes. Please list the codes for the federally regulated hazardous waste handled at the site. List them in the order they are presented in the regulations (e.g., D001, D003, F007, U112). Use an additional page if more space is needed. If there are more than 7 waste codes and they are the same as listed in the most recent RCRAInfo source record, you do not need to list them all. Instead just indicate the date of the most recent source record.
