**Subject: Waterline Dewatering Trench Pumping – Return To Compliance
ESOI Otter Creek Road Facility
U.S. EPA ID# OHD 045 243 706
RCRA Hazardous Waste
Lucas County, NWDO**

Dear Mr. Humphrey:

Ohio EPA received your response to my March 16, 2011, Waterline Dewatering Trench Pumping Notice of Violation (NOV) letter on May 23, 2011. Your response, dated May 18, 2011, included documentation regarding the environmental factors which influenced the violations as well as facility personnel training records.

Based upon my review of ESOI's May 18, 2011, response and these training records, ESOI has abated the violations of Permit Conditions G.4(d)(ii) and G.4(d)(iv) cited in the March 16, 2011, NOV letter.

Please be advised that Permit Condition A.9 of your Ohio Hazardous Waste Installation and Operation Permit requires ESOI to operate and maintain the facility to achieve compliance with the terms and conditions of this permit using proper operation and maintenance including effective management practices, adequate operator staffing and training, and where appropriate, adequate process controls. This provision requires the operation of back-up or auxiliary facilities or similar systems only when necessary to achieve compliance with the terms and conditions of this permit. Future violations of Permit Conditions G.4(d)(ii) and G.4(d)(iv) could lead to an enforcement action by this agency.

I suggest that you contact this agency at your convenience to discuss any measures you may be considering to reduce the likelihood of future violations of these permit conditions.

Mr. Kenneth Humphrey
