Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During the Three Year (2008-2010) time period we did not monitor for the following contaminants and therefore cannot be sure of the quality of our drinking water during that time: MERCURY.

You do not need to take any actions in response to this notice.

What Is Being Done?

Upon being notified of this violation, the water supply was required to have the drinking water analyzed for the above mentioned parameters. The water supplier will take steps to ensure that adequate monitoring will be performed in the future.
