RE: MAZZELLA LIFTING TECHNOLOGIES, OHR 000 134 882, CUYAHOGA COUNTY, SQG, NOTICE OF VIOLATION/PARTIAL RETURN TO COMPLIANCE

Dear Mr. Evangelista:

On February 9, 2012, Ohio EPA's Division of Materials and Waste Management, represented by Edward D'Amato, inspected Mazzella Lifting Technologies for compliance with Ohio hazardous waste laws and regulations found in Chapters 3734 of the Ohio Revised Code (ORC) and 3745 of the Ohio Administrative Code (OAC). You represented Mazzella Lifting Technologies during the inspection.

Mazzella Lifting Technologies manufactures overhead cranes, slings and other lifting products for various industries.

The following violations were found:

**1. Labeling of Containers (SQG)
OAC 3745-52-34(D)(4)**

While being accumulated and/or treated on-site, each container and tank is labeled or marked clearly with the words "Hazardous Waste"

There was one container of hazardous waste that was not labeled per this rule. This violation was corrected at the time of the inspection when a hazardous waste label was applied to the drum.

**2. General Inspection Requirements
OAC 3745-66-74**

The owner or operator shall inspect areas where containers are stored at least weekly, looking for leaks and for deterioration caused by corrosion or other factors.

Mazzella Lifting Technologies is not conducting weekly inspections per this rule. To correct this violation, you must submit copies of inspection forms showing that two weekly inspections have been completed.

**3. Emergency Equipment Inspections
OAC 3745-65-33**

All communication and emergency equipment shall be tested and maintained as necessary to assure proper operation in time of emergency...The owner or operator must record the inspections in a log or summary.

Mazzella Lifting Technologies has not been conducting emergency equipment inspections per this rule. To correct this violation, you must immediately begin conducting such inspections. You must send a copy of an inspection form showing that one inspection has been completed and you must notify this office what the inspection interval will be. A sample inspection form was e-mailed to you on February 13, 2012.

**4. Used Oil Storage Requirements for Generators (Labels)
OAC 3745-279-22(C)**

Containers and above ground tanks used to store used oil at generator facilities shall be labeled or marked clearly with the words "Used Oil"

There was one container of used oil that was not labeled per this rule. This violation was corrected during the inspection when a used oil label was applied to the drum. No further action is required regarding this violation.

Ohio EPA has the following suggestions for Mazzella Lifting Technologies. The company is under no obligation to adopt any of them:

1. Mazzella Lifting Technologies may want to consider purchasing a small solvent still to reclaim solvent from its paint waste. Such stills are common at facilities that do solvent-based painting. They reduce solvent purchased and the amount of hazardous waste generated.
2. Mazzella Lifting Technologies may want to evaluate the potential of water-based paints to replace the solvent-based paints it uses. Ohio EPA's Office of Compliance Assistance and Pollution Prevention (OCAPP) may be able to assist you with this. The office can be reached toll free at (800) 329-7518.

Mazzella Lifting Technologies needs to immediately take the necessary measures to return to compliance with Ohio's environmental laws. **Within 14 days** of receipt of this letter, Mazzella Lifting Technologies is requested to provide documentation to this office including the steps taken to abate the violations cited above. Documentation of steps taken to return to compliance includes written correspondence, updated policies, and photographs, as appropriate, and may be submitted via the postal service or electronically to edward.damato@epa.state.oh.us.

Please be advised that violations cited above will continue until the violations have been properly abated. Failure to comply with Chapter 3734 of the Ohio Revised Code and rules promulgated thereunder may result in a civil penalty of up to \$10,000 per day for each violation. It is imperative that you return to compliance. If circumstances delay the abatement of violations, Mazzella Lifting Technologies is requested to submit written correspondence of the steps that will be taken and in what time frame to attain compliance.

If you have any questions, please contact me at (330) 963-1170 or by e-mail at the address above.

**USED OIL INSPECTION CHECKLIST
GENERATORS, COLLECTION CENTERS AND AGGREGATION POINTS**

NOTE: 1. A facility is subject to the federal SPCC regulations (40 CFR 112) if it is non-transportation related (e.g., fixed) and has an aggregate above ground storage capacity greater than 1,320 gallons or a total underground storage capacity greater than 42,000 gallons of oil (including used oil), and there is reasonable expectation of a discharge to navigable waters.

2. Inspectors can check BUSTR's web-site at https://www.comapps.ohio.gov/sfm/fire_apps/bust/bustr/PublicInquiry.asp to determine if a UST containing used oil is registered with BUSTR. Inspectors may call BUSTR at 614-752-7938 or a BUSTR site coordinator to report an unregistered UST or a UST that appears to not be in compliance with BUSTR regulations. A list of BUSTR coordinators by county are at:
