**RE: E L STONE COMPANY, OHD 004 190 773, SUMMIT COUNTY, NOTICE OF VIOLATION/RETURN TO COMPLIANCE**

Dear Mr. Miller:

On February 6, 2012, Ohio EPA's Division of Materials and Waste Management, represented by Edward D'Amato, inspected E L Stone Company for compliance with Ohio's hazardous waste laws and regulations found in Chapters 3734 of the Ohio Revised Code (ORC) and 3745 of the Ohio Administrative Code (OAC). You represented E L Stone Company during the inspection.

E L Stone Company coats and paints metal parts for various applications.

The following waste streams were identified:

1. Waste paint related material which is disposed as hazardous waste through Vexor Technologies and the Hukill Chemical Company.
2. Paint filters which are disposed as hazardous waste.
3. Paint booth filters which are disposed as solid waste.
4. Sand blast waste.
5. Dust collector waste which is recycled back into the process.
6. Used oil which is either disposed through Rice Oil or given to other businesses to burn in used oil furnaces.
7. Universal Waste Lamps which are recycled through Vexor.

The following violations were found:

**1. Manifest Recordkeeping  
OAC 3745-52-40**

*The generator must keep a copy of each manifest signed [by the transporter and the treatment, storage or disposal facility accepting the waste]... This signed copy must be retained as a record for at least three years from the date the waste was accepted by the original transporter*

E L Stone Company was unable to produce hazardous waste manifests for 2010. This violation was corrected on 2/7/12 when you submitted an e-mail containing copies of the manifests. No further action is required regarding this violation.

**2. Labeling of Hazardous Waste Containers**  
**OAC 3745-52-34 (A)(3)**

*While being accumulated...on site, each container and tank is labeled or marked clearly with the words Hazardous Waste*

One container of hazardous waste in E L Stones less-than-90-day hazardous waste accumulation area was not labeled per this rule. This violation was corrected on 2/10/12 when you submitted photographs via e-mail showing the drum had been labeled. No further action is required regarding this violation.

**3. Dating of Containers (SQG)**  
**OAC 3745-52-34(D)(4)**

*A Small Quantity Generator of hazardous may accumulate hazardous waste without a permit, provided that the date upon which each period of accumulation and/or treatment begins is clearly marked and visible for inspection on each container...*

One container of hazardous waste in E L Stones less-than-90-day hazardous waste accumulation area was not dated per this rule. This violation was corrected on 2/10/12 when you submitted photographs via e-mail showing the drum had been dated. No further action is required regarding this violation.

**4. Satellite Accumulation**  
**OAC 3745-52-34 (C)(2)**

*A generator who accumulates in excess of 55-gallons in a satellite accumulation area, must mark the satellite container(s) with the date the excess amount began accumulating and, within 3-days or less, either remove the container or begin complying with the rest of the container rules.*

There was a full, 55-gallon satellite accumulation drum in Building 2. The drum had been full for two weeks and a second drum had begun to be used to accumulate hazardous waste. This violation was corrected on 2/10/12 when you submitted a photograph showing the drum had been dated and moved to the less-than-90-day accumulation area. No further action is required regarding this violation.

**5. Required Equipment (Spill Control)**  
**OAC 3745-65-32(C)**

*All facilities shall be equipped with the following equipment... portable fire extinguishers, spill control equipment and decontamination equipment*

At the time of the inspection, you were unable to locate emergency equipment required by this rule. This violation was corrected on 2/7/12 when you submitted photographs of the spill cabinet and equipment. No further action is required regarding this violation.

**6. Emergency Equipment Inspections**  
**OAC 3745-65-33**

*All communication and emergency equipment shall be tested and maintained as necessary to assure proper operation in time of emergency...The owner or operator must record the inspections in a log or summary.*

E L Stone has not been conducting emergency equipment inspections per this rule. This violation was corrected on 2/7/12 when you submitted a copy of an inspection completed on February 6, 2012. Such inspections must continue at an interval determined by E L Stone Company. No further action is required regarding this violation.

**7. Emergency Response Information**  
**OAC 3745-52-34(D)(5)(b)**

*A small quantity generator shall post the following information next to the telephone:*

- (i) The name and telephone number of the emergency coordinator*
- (ii) Location of fire extinguishers and spill control material and if present, fire alarms and;*
- (iii) The telephone number of the fire department unless the facility has a direct alarm.*

E L Stone Company did not have the emergency information required by this rule posted by the telephone. This violation was corrected on 2/10/12 when you submitted a photograph showing that the information had been posted as required. No further action is required regarding this violation.

**8. Used Oil Fuel Marketer**  
**OAC 3745-279-70(B)**

*Any person who first claims that used oil to be burned for energy recovery meets the used oil fuel specifications set forth in the Ohio Administrative code is a used oil marketer and must notify Ohio EPA and obtain a U.S. EPA Identification number*

E L Stone Company has been giving its used oil to other businesses to burn it in used oil furnaces but has not registered with Ohio EPA as a used oil marketer. This violation was corrected on February 15, 2012 when you sent an e-mail to this office explaining that used oil will be managed through Rice Oil from now on. No further action is required regarding this violation.

**9. Tracking of Used Oil to a Burner**  
**3745-279-74(B)**

*Any person who first claims that used oil to be burned for energy recovery meets the fuel specifications found in OAC rule 3745-279-11, must keep a record of each shipment of used oil to an on-specification used oil burner. The record must include information to make the determination that the used oil meets the specifications.*

E L Stone Company has not been tracking shipments of the used oil it gives to other businesses to burn in used oil furnaces. This violation was corrected on February 15, 2012 when you sent an e-mail to this office explaining that used oil will be managed through Rice Oil from now on. No further action is required regarding this violation.

**10. Used Oil Specification  
OAC 3745-279-72**

*A generator, transporter, processor/re-refiner or burner shall determine that used oil that is to be burned for energy recovery meets the specification of OAC 3745-279-11 by performing analyses, or obtaining copies of analyses or other information documenting that the used oil fuel meets the specifications.*

E L Stone Company has not demonstrated that the used oil it has been giving to other businesses to burn in used oil furnaces meets the specification outlined in OAC 3745-279-11. This violation was corrected on February 15, 2012 when you sent an e-mail to this office explaining that used oil will be managed through Rice Oil from now on. No further action is required regarding this violation.

In addition to the above violations, the following concern was noted:

11. At the time of the inspection, E L Stone Company was not able to demonstrate that the sand blast waste in Building 5 or the dust collector waste in Building 6 is being properly managed as non-hazardous. This violation was corrected when you sent documentation via e-mail on 2/9/12 and 2/7/12 respectively demonstrating that both waste streams are non-hazardous. No further action is required regarding this concern.

No response to this letter is required.

Failure to list specific deficiencies or violations in this communication does not relieve E L Stone Company from the responsibility of complying with all applicable Ohio EPA laws and regulations. Please be advised that present or past instances of non-compliance can continue as subjects of pending or future enforcement actions.

Please feel free to contact me at (330) 963-1170 or by e-mail at [ed.damato@epa.state.oh.us](mailto:ed.damato@epa.state.oh.us) if you have any questions.
