RE: FOWLER CO., OHR000166652, SUMMIT COUNTY, NOV-RTC

Dear Mr. Johnsen:

On January 11 and January 17, 2012, Sheryl Slone and this writer, representing Ohio EPA, Division of Materials and Waste Management (DMWM), visited Fowler Company (Fowler), located at 1155 Emmitt Road in Akron, Ohio to conduct a hazardous waste compliance evaluation inspection (CEI). Fowler was represented by you.

The purpose of the inspection was to determine Fowler's compliance with Ohio's hazardous waste laws as found in Chapter 3734 of the Ohio Revised Code (ORC) and Chapter 3745 of the Ohio Administrative Code (OAC). The inspection included a review of the facility's operations, as well as written documentation. Fowler was inspected for the requirements of a small quantity handler of universal waste.

On January 13, January 20, January 23, January 27, February 15 and February 17, 2012, Fowler provided information concerning waste evaluation and universal waste management and shipments.

Information obtained pertaining to Fowler's processes and waste generation is discussed on the Process Description-Waste Activities Summary Sheet within the enclosed inspection checklists.

Based on the inspection, Ohio EPA identified the following violations:

1. **Universal Waste Management Standards for Small Quantity Handlers, OAC rule 3745-273-13(D)(1):** A small quantity handler of universal waste must contain any lamp in containers or packages that are structurally sound, adequate to prevent breakage, and compatible with the contents of the lamps. Such containers and packages must remain closed and must lack evidence of leakage, spillage, or damage that could cause leakage under reasonably foreseeable conditions.

Fowler failed to accumulate universal waste lamps in containers. During the January 17, 2012 re-inspection, Ohio EPA observed that Fowler was accumulating universal waste lamps in compliance with this rule. **This violation has been adequately addressed. No further response is requested.**

2. **Labeling/marking Standards for Small Quantity Handlers of Universal Waste, OAC rule 3745-273-14(A):** (A) Universal waste batteries or a container in which the batteries are contained, must be labeled or marked clearly with any one of the following phrases: "universal waste - battery(ies)," or "waste battery(ies)," or "used battery(ies)."

Fowler failed to label multiple containers of universal waste lamps with the words required by this rule. During the January 17, 2012 re-inspection, Ohio EPA observed that the containers of universal lamps were labeled in compliance with this rule. **This violation has been adequately addressed. No further response is requested.**

3. **Employee Training for Small Quantity Handler of Universal Waste, OAC rule 3745-273-16:** A small quantity handler of universal waste must inform all employees who handle or have responsibility for managing universal waste. The information must describe proper handling and emergency procedures appropriate to the types of universal waste handled at the facility.

Fowler failed to provide training to employees on universal waste management requirements. On January 27, 2012, Fowler submitted information concerning universal waste management training provided to employees. **This violation has been adequately addressed. No further response is requested.**

4. **Used Oil Storage Requirements for Generators, OAC rule 3745-279-22(C)(1):** Used oil generators must store used oil in containers and tanks that are in good condition and not leaking. The containers and tanks must be labeled with the words "Used Oil." If used oil is released to the environment, the generator must stop the release, contain the used oil, and clean-up and properly manage the released oil and other materials.

Fowler failed to label 17 containers with the words "Used Oil." Fowler's February 17, 2012 response indicated that the contents of the containers were consolidated and labeled as "Used Oil." **Based on submitted documentation, this violation has been adequately addressed. No further response is requested.**

Ohio EPA offers the following comments:

1. You may find copies of the hazardous waste rules and other information on Ohio EPA's web page at: <http://epa.ohio.gov/dhwm>
2. Ohio EPA has created an electronic news service to provide facilities with quick and timely updates on news and events related to environmental matters in Ohio. For more information, please refer to: <http://ohioepa.custhelp.com/ci/documents/detail/2/subscriptionpage>
3. The Ohio Department of Development's Office of Energy Efficiency may be able to help with energy efficiency issues. For more information, please refer to: <http://development.ohio.gov/Energy>
4. You may be able to reduce the amount of waste your facility generates by finding ways to recycle, reduce or eliminate it. Ohio EPA's Office of Compliance Assistance and Pollution Prevention (OCAPP) provides free compliance and pollution prevention assistance on environmental issues related to air, land and water. Should your facility be interested in receiving a free pollution prevention assessment in the future, please contact me or OCAPP. OCAPP may be contacted at (800) 329-7518 or via the internet at: <http://epa.ohio.gov/ocapp/contact.aspx>

5. Ohio EPA issued an EPA ID number (OHR000166652) to track our inspection activity at Fowler. If Fowler wishes to use an EPA ID number for manifesting and other hazardous waste, used oil or universal waste activities, Fowler must complete and submit a Notification of Regulated Waste Activity form (EPA Form 9029). This form is available on Ohio EPA's internet site at <http://epa.ohio.gov/Default.aspx?tabid=3915> or you may contact me for a copy.

Ohio EPA's failure to list specific deficiencies or violations in this letter does not relieve Fowler from having to comply with all applicable regulations.

Should you have any questions, please contact me at (330) 963-1108.

Sincerely,

Frank A. Zingales

A facility is subject to the federal SPCC regulations (40 CFR 112) if it is non-transportation related (e.g., fixed) and has an aggregate above ground storage capacity greater than 1,320 gallons or a total underground storage capacity greater than 42,000 gallons of oil (including used oil), and there is reasonable expectation of a discharge to navigable waters.

2. Inspectors can check BUSTR's web-site at https://www.comapps.ohio.gov/sfm/fire_apps/bust/bustr/PublicInquiry.asp to determine if a UST containing used oil is registered with BUSTR. Inspectors may call BUSTR at 614-752-7938 or a BUSTR site coordinator to report an unregistered UST or a UST that appears to not be in compliance with BUSTR regulations.
