Mr. Gary Spencer
Van Dorn Demag Corp.
11792 Alameda Drive
Strongsville, Ohio 44149

Dear Mr. Spencer:

Thank you for accompanying me during Ohio EPA's February 13, 2012 inspection of Van Dorn Demag Corporation (VDD) in Strongsville, Ohio. I inspected VDD to determine its compliance with Ohio's hazardous waste laws as found in Chapter 3734 of the Ohio Revised Code (ORC) and Chapter 3745 of the Ohio Administrative Code (OAC). My inspection included a review of company operations and written documentation. In addition to the inspection for compliance with Ohio's hazardous waste rules, the facility was inspected for compliance with Ohio's universal hazardous waste rules.

VDD's Strongsville facility is primarily a parts supplier for Van Dorn plastic injection-molding machines. Manufacturing has largely ceased at this facility. The facility does do injection molding machine rebuilding projects for customers requesting this service. As part of the rebuilding process, some paint work is done in a paint booth. The spent paint and gun cleaner is managed as a hazardous waste (D001, F003) and is generated infrequently at a rate of less than 100 kg/month. The rate of generation makes VDD a conditionally exempt small quantity generator of hazardous waste. VDD also generates universal waste lamps. At the time of my inspection, no universal waste lamps were being accumulated. You indicated that the facility's waste lamps were recycled through a VDD employee who took the lamps home with him and gave them to his home city, Lorain, Ohio, for disposal as household waste.

The following violation of Ohio's hazardous waste rules was found during this inspection.

1. Waste Evaluation, OAC 3745-52-11:

Any person who generates a waste must evaluate the waste to determine if it is a hazardous waste in accordance with the criteria set forth in OAC Chapter 3745-51. VDD violated this regulation by disposing of waste lamps (primarily fluorescent lamps) through an employee managing the waste as household waste without determining whether or not the waste lamps are a hazardous waste. The waste fluorescent lamps contain mercury and may contain other hazardous metals. These may therefore be a hazardous waste. To abate this violation, submit documentation of VDD's evaluation of the waste lamps in compliance with Ohio's hazardous waste regulations.

As an alternative to determining whether your particular waste lamps are hazardous waste, you may wish to manage them as Universal Waste. In general, this would involve saving the waste lamps in a properly labeled and closed container and having them recycled by a lamp recycler. If VDD chooses to manage the waste lamps as Universal Waste and recycle the lamps through an approved lamp recycler, indicate this in your response letter.

VDD needs to immediately take the necessary measures to return to compliance with Ohio's environmental laws. Within 14 days of receipt of this letter, VDD is requested to provide documentation to this office including the steps taken to abate the violation cited above. Documentation of steps taken to return to compliance includes written correspondence, updated policies, and photographs, as appropriate, and may be submitted via the postal service or electronically to tom.roth@epa.ohio.gov.

Please be advised that the violation cited above will continue until the violation has been properly abated. Failure to comply with Chapter 3734 of the Ohio Revised Code and rules promulgated thereunder may result in a civil penalty of up to \$10,000 per day for each violation. It is imperative that you return to compliance. If circumstances delay the abatement of the violation, VDD is requested to submit written correspondence of the steps that will be taken by date certain to attain compliance.

Enclosed you will find a copy of the checklists that I completed as a result of the inspection. Should you have any questions, please feel free to call me at (330) 963-1231. You can find copies of the rules and other information on the Division of Materials and Waste Management's web page at: <http://www.epa.state.oh.us/dhwm/>.

Sincerely,

Tom Roth
