Mr. Tim Bommer, V. P.
CAMCO Recycling, Inc.
100 Fair Street
Dillonvale, Ohio 43917

Dear Mr. Bommer:

On March 18, 2008, John Rochotte and I performed a complaint investigation for the property located on Township Road 1187 in Dillonvale, Ohio. On March 16, 2008, this office received a complaint alleging that oil and other hazardous materials were being placed on the ground and may be a threat to the city's wellfield. We did not observe signs of deliberate releases of oil or other fluids during the investigation, however, we did observe small oil sheens around the property. We also observed that several 55 gallon drums of used are being stored outside without bungs which could cause releases in the futures.

Based on the investigation, the following violation was observed; please provide the requested information ***within 30 days*** of your receipt of this letter:

- (1) **OAC Rule 3745-279-22(C), Used oil storage requirements for generators:** Containers and aboveground tanks used to store used oil at generator facilities shall be labeled or marked clearly with the words, "Used Oil."

At the time of the inspection, approximately seven drums of used oil were not labeled "Used Oil." These drums also do not have bungs placed into them, allowing precipitation to enter and will eventually cause releases of oil. These drums must either be labeled and properly closed or the contents must be removed by a used oil transporter with an EPA identification number (see the used oil guidance attached to this letter). To demonstrate compliance with this rule, provide photographs showing the drums properly labeled and closed or a receipt showing that the used oil was picked up by a proper transporter.

Comments:

- 1) Several auto batteries were observed scattered around the site. As we discussed, these must be collected and sent to a recycler in a timely manner. Please collect and recycle these batteries and store batteries in a protected area if they will be accumulated in the future. Please provide documentation indicating that these issues have been addressed.

- 2) Three piles of scrap tires and piles of solid waste (see attached photographs) were observed around the site. As we discussed, please contact Pete Thompson or the Jefferson County Health Department to properly address these issues. Additionally, other operations at this site that appear to create small releases of oils or fuels that may present a threat to ground water, which is a particular concern since your facility is within the protection zone for Dillonvale's wellfield (see attached aerial photograph). You should consider managing these materials in a manner that minimizes the potential for releases to soil. If the wellfield would become contaminated by this site, you could be held liable for any necessary cleanup.

Should you have any questions, please feel free to call me at (740) 380-5278. You can find copies of the rules and other information on the division's web page at <http://www.epa.state.oh.us/dhwm/>

Sincerely,

Rich Stewart
District Representative
Division of Hazardous Waste Management

Waste Codes for Federally Regulated Hazardous Wastes. Please list the codes for the federally regulated hazardous waste handled at your site. List them in the order they are presented in the regulations (e.g., D001, D003, F007, U112). Use an additional page if more space is needed. If there are more than 7 waste codes and they are the same as listed in the most recent RCRAInfo source record, you do not need to list them all. Instead just indicate the date of the most recent source record.					
Comments: Use this area to describe whether the inspection was announced, whether the waste is stored in tanks or containers, etc.
