Hazardous Waste
**Notice of Violation/
Return to Compliance**

July 27, 2009

Mr. Chad Lehmann
Safety & Environmental Manager
Riker Products, Inc.
4901 Stickney Avenue
Toledo, Ohio 43612

Dear Mr. Lehmann:

Thank you for accompanying me during Ohio EPA's July 15, 2009, compliance evaluation inspection of Riker Products, Inc. (RPI) located at 4901 Stickney Ave. in Toledo, Ohio. I inspected RPI to determine its compliance with Ohio's hazardous waste laws as found in Chapter 3734. of the Ohio Revised Code (ORC) and Chapter 3745. of the Ohio Administrative Code (OAC). My inspection included observations of facility operations and a review of written documentation.

RPI manufactures mufflers, spark arrestors, stacks, pipes, tubing and elbows for vehicles. Processes include cutting, bending, welding and some painting of tubes. According to you, process refinements have resulted in approximately 94% reduction in hazardous waste generation.

RPI was operating as a small quantity generator at the time of my inspection. RPI generates the following wastes:

1. Paint Waste F003: Some parts are painted in either the manual or automatic spray booths. The spray guns, turbo disc and lines are flushed daily with xylene. The spent xylene is poured into a 55-gallon drum. This spent solvent is poured into a distillation unit on a regular basis. The reclaimed solvent is reused for flushing the painting equipment. The still bottoms are sent off-site as hazardous waste. Approximately two 55-gallon drums of this waste are generated per month. It is shipped by Cousins Waste Control Corp/PSC to Petro-Chem in Detroit, Michigan.

Page 2

2. Paint Booth Filters: The filters are not hazardous waste. Once a week they are removed, placed into a 55-gallon drum and removed by Cousins Waste Control Corp/PSC.
3. Aerosol Can Waste D001: Cans of spray paint containing acetone, cyclohexane and dimethyl ether are punctured in the unit and the contents are drained into a 55-gallon drum. This is an extremely small quantity of waste and it may take years to fill the satellite accumulation drum.
4. Spent Solvent from Parts Washer: RPI operates one parts washer. The spent material from the unit is managed by Heritage, through a service agreement, and is part of its Continued Use program, so it is not a waste.
5. Spent Coolant: This non-hazardous waste is managed as an industrial waste and is removed by Cousins Waste Control Corp/PSC.
6. Universal Waste Lamps: RPI accumulates spent lamps and ships them to Environmental recycling in Bowling Green, Ohio.

As a result of my inspection, I found the following violations of Ohio's hazardous waste laws. In order to correct these violations, you must do the following and send me the required information, **within 30 days** of your receipt of this letter:

1. **Satellite Accumulation Area Requirements**
OAC Rule 3745-52-34(C)(1)(b)

The generator must mark his satellite accumulation containers either with the words "Hazardous Waste" or with other words that identify the contents of the containers.

RPI failed to mark the following containers of spent solvent in the paint room with either the words "Hazardous Waste" or other words to describe the waste: one 55-gallon drum by the manual paint spray booth, one 55-gallon drum by the distillation unit, one 5-gallon pail by the distillation unit and one 55-gallon drum of still bottoms. RPI marked these containers during my inspection. **Therefore, this violation has been corrected.**

2. **Universal Waste Labeling - Lamps**
OAC Rule 3745-273-14(E)

Each lamp or a container or package in which such lamps are contained must be labeled or marked clearly with one of the following phrases: "Universal Waste Lamps", "Waste Lamps" or "Used Lamps".

RPI did not properly label the containers of spent lamps with one of the required phrases. RPI marked these containers during my inspection. **Therefore, this violation has been corrected.**

During the inspection we discussed the concept of counting your hazardous waste. You should be counting the spent solvent when it is generated. I have enclosed copies of some correspondence from Ohio EPA which, along with other issues, indicates that the spent solvent you generate should be counted monthly as hazardous waste. RPI should still be operating as a small quantity generator.

Please be aware that incandescent, fluorescent, metal halide, neon, high-intensity discharge, high-pressure sodium and mercury-vapor lamps could be hazardous waste when discarded. Fluorescent lamps may contain up to 40 milligrams (mg) of mercury, depending on the brand and manufacturer. Lamps may also contain lead and cadmium. Many lamps exhibit a characteristic of toxicity for heavy metals when disposed. During the inspection, I gave you copies of the following documents, to assist you in properly managing your spent lamps: Fluorescent Lamps: What You Should Know and Computer, Fluorescent Lamp and Ballast Recyclers. I recommend that you review these documents carefully and contact me if you have any questions. The first document describes the rules you must follow in order to manage lamps as a universal waste.

You may be able to further reduce the waste your company generates. If you find ways to recycle, reduce or altogether eliminate the amount of waste that your company generates you may be able to reduce your treatment and disposal costs and you may possibly reduce your regulatory requirements. During the inspection, I gave you a copy of Pollution Prevention Opportunities, a worksheet that can help you recognize opportunities for reducing waste and conserving energy at your business. I also gave you a copy of the fact sheet Management of Electronic Waste from Businesses. Please review this information and contact me if you have any questions.

I encourage you to schedule a pollution prevention assessment for your business because there are often many opportunities for businesses like yours to reduce waste and save money.

c.	Is a copy of the reclamation agreement kept on-site for at least three years after termination/expiration of the agreement?	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input checked="" type="checkbox"/>
NOTE: If wastes are reclaimed under a contractual agreement and an answer to questions 10(a) through 10(c) is no, the generator is in violation of 3745-52-20 (A) (B) & (D), 3745-52-22 and 3745-52-23. Even if the waste is being reclaimed under agreement, LDRs still apply. Complete LDR checklist.

NOTE: Remind the generator that the certification statement they signed indicates: 1) they have properly prepared the shipment for transportation and 2) they have made a good faith effort to minimize their waste generation.		
15.	If the generator did not receive a return copy of each completed manifest within 60 days of being accepted by the transporter did the generator submit to Ohio EPA, a copy of the manifest with some indication that the generator has not received confirmation of delivery? NOTE: Waste generated at one location and transported along a publicly accessible road for temporary consolidated storage or treatment on a contiguous property also owned by the same person is not considered "on-site" and manifesting and transporter requirements must be met. To transport "along" a public right-of-way the destination facility has to act as a transfer facility or have a permit because this is considered to be "off-site." For additional information see the definition of "on-site" in OAC rule 3745-50-10.

-----	---	--

	a.	Is a LDR treatment method, other than DEACT or a numerical value, specified for the waste? [3745-270-03(B) and 3745-270-40(A)(3)]	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input checked="" type="checkbox"/>
--	----	---	--

NOTE: If Yes, HW is improperly being treated by dilution.

	b.	Does the waste carry the D001 code and contain ≥10% TOC?	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input checked="" type="checkbox"/>
--	----	--	--

	c.	Does the wastewater treatment process include a process to separate/recover the organic phase of the waste?	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input checked="" type="checkbox"/>
--	----	---	--

NOTE: If the answers to b & c are Ayes@ and Ano@, respectively, waste is improperly being treated by dilution and generator is in violation of [3745-270-03(B) and 3745-270-40(A)(3)]

NOTE: A list of separation/recovery processes are given in 3745-270-42 under RORG.
