Re: Storm Water Inspection at Wheaton Village

Dear Mr. Pruchnicki:

This letter is written in follow-up to a construction storm water inspection I conducted at Wheaton Village located at Taylor Road and Main Street in Licking County July 27, 2009. The purpose of the inspection was to evaluate compliance with the General Storm Water Permit Associated with Construction Activities. During the inspection, I noted the following:

Construction Status

- The site has remained idle for several months. Please indicate in your response letter the construction status for the site to ensure continued compliance with the general storm water permit.

Sediment and Erosion Controls

- Site remains temporarily protected from erosion with a vegetative cover.
- Centralized sediment basin is maintained and appears to be working effectively.

If you have any questions regarding this letter or the inspection, please do not hesitate to call me at our Central District Office at (614) 728-3844. In addition, please provide a written response to the action items addressed above within ten days from receipt of this letter. A follow-up inspection will be conducted to ensure the minimum conditions of the General Permit have been met.

Sincerely,

Harry Kallipolitis
Storm Water Coordinator
Division of Surface Water
Central District Office
