Re: **Advance Auto Parts Distribution Center #23**  
**Small Quantity Generator**  
**U.S. EPA ID#: OHR000026104**  
**Delaware County, CDO**  
**NOV**

Dear Mr. Jones:

Thank you for accompanying me during Ohio EPA's November 10, 2009, inspection of Advance Auto Parts' Distribution Center #23 in Delaware, Ohio. I inspected Advance Auto to determine its compliance with Ohio's hazardous waste laws and rules as found in Chapter 3734 of the Ohio Revised Code (ORC) and Chapter 3745 of the Ohio Administrative Code (OAC). At the time of the inspection, Advance Auto was operating as a small quantity generator (SQG) of hazardous waste and a used oil generator.

During the inspection, I found the following violations of Ohio's hazardous waste rules. In order to correct these violations, you must do the following and send me the required information *within 30 days* of your receipt of this letter.

1. **OAC Rule 3745-52-34(D)(5)(b), Emergency information posted next to the telephone:** A SQG that accumulates hazardous waste on site must post the following information next to the telephone: (i) the name and telephone number of the emergency coordinator; (ii) location of fire extinguishers and spill control material, and, if present, fire alarms; and (iii) the telephone number of the fire department, unless the facility has a direct alarm.

At the time of my inspection, Advance Auto did not have the required emergency information posted next to the telephone.

- To return to compliance, Advance Auto must post the required emergency information next to the telephone and submit a copy of the information to me *within 30 days* of receipt of this letter.
2. **OAC Rule 3745-66-74, Inspections of containers:** The owner or operator must inspect areas where containers are stored, at least weekly, looking for leaks and for deterioration caused by corrosion or other factors. The owner or operator must record inspections in an inspection log or summary.

Ted Strickland, Governor  
Lee Fisher, Lieutenant Governor  
Chris Korleski, Director

At the time of my inspection, Advance Auto did not have any documentation demonstrating that the required weekly inspections of hazardous waste containers were being completed in accordance with OAC Rule 3745-66-74.

- To return to compliance, Advance Auto must record weekly inspections of containers in an inspection log or summary. Please submit a few weeks worth of completed checklists to me **within 30 days** of receipt of this letter. An example SQG container inspection log is available at: <http://epa.ohio.gov/portals/32/pdf/ssglog.PDF>.

**General Comments:**

- As discussed during the inspection, Advance Auto currently manages empty aerosol cans as nonhazardous waste. Instead of sending these cans off site for disposal, you may wish to look into recycling these cans. An aerosol can that no longer contains a significant amount of liquid meets the definition of scrap metal and would be exempt from regulation when sent for recycling.

If you would like a free, non-regulatory on-site pollution prevention assessment or if you would like more information about pollution prevention, please contact Ohio EPA's Office of Compliance Assistance and Pollution Prevention (OCAPP) at (800) 329-7518 or visit the following web address: <http://www.epa.ohio.gov/ocapp/>.

In addition, Ohio EPA's Division of Hazardous Waste Management (DHWM) has created an electronic news service to provide you with updates related to hazardous waste activities in Ohio. You can find more information and sign up for this free service at the following link: [http://ohioepa.custhelp.com/cgi-bin/ohioepa.cfm/php/enduser/doc\\_serve.php?2=subscriptionpage](http://ohioepa.custhelp.com/cgi-bin/ohioepa.cfm/php/enduser/doc_serve.php?2=subscriptionpage).

Enclosed you will find a copy of the checklists I completed as a result of the inspection. Should you have any questions, please feel free to call me at (614) 728-3887. You can find copies of the rules and other information on the division's web page at: <http://www.epa.ohio.gov/dhwm/>.

Sincerely,

*Melissa M. Storch*

**PROCESS DESCRIPTION SECTION**

Give a general process description (include all processes at the facility)

Advance Auto Parts Distribution Center #23 (Advance Auto) is located at 1675 Highway 42 South in Delaware, Ohio. This location serves as a storage and distribution center for surrounding Advance Auto Parts stores. Most of the hazardous waste that is generated at the site comes from recalled/broken products (e.g., aerosol cans, fuel additives, paints) that cannot be repackaged or resold. This center also operates a maintenance shop which services and repairs its forklifts. Used oil and spent lead acid batteries are generated in this area of the facility. Metal pipes and/or parts are also collected throughout the facility for either resale or scrap.

There is also a specific "recall area" in the warehouse. This area houses products that have been recalled. A determination as to whether they can be resold or have to be disposed of as waste is made within a week or two. All of the recalls are from in house, not from other Advance Auto Parts stores.

**WASTE ACTIVITIES AND P2 SUMMARY SECTION**

For each of the processes listed above that generate a waste give the following information: (1) name of process generating waste, (2) name or description of waste generated (e.g. sludge, solvent, ash, used oil, spent lamps, etc.), (3) EPA waste codes, if applicable, (4) quantity generated per month, (5) type of accumulation (container, tank, etc.) (6) waste accumulation location in facility, (7) type of on-site treatment (if used), (8) name of off-site management facility and type of waste management activity occurring there, (9) Current P2 activities, and (10) P2 opportunities.

At the time of the inspection, Advance Auto was operating as a small quantity generator (SQG) of hazardous waste. Recalled/broken products (D001, D002, D003) are collected in drums in the hazardous waste accumulation area. For example, contents of broken cans of fuel additives are drained into drums, while aerosol cans are punctured and contents drained into other drums. The empty aerosol cans are managed as nonhazardous waste. The type of waste generated at the center depends on what products are recalled or broken, but mostly the waste is ignitable (D001). Hazardous waste is managed by Clean Harbors about 3 to 5 times a year and sent to Clean Harbors El Dorado, LLC for fuel blending (H061) or incineration (H040), depending on what the waste is.

Used oil generated in the maintenance shop is collected in a 300-gallon container and managed by Safety Kleen Systems, Inc. Spent lead acid batteries (managed under OAC 3745-266) are sent to Tri City Industrial Power in Columbus, Ohio. Scrap metal is sent off site to Sims Bros., Inc. for recycling. No universal waste was on site at the time of my inspection. Cardboard is also sent off site for recycling.
