**Re: Storm Water Inspection at Byers Toyota / Delaware County
Permit #: 4GC02939*AG**

Dear Mr. Durivage:

This letter is written in follow-up to a construction storm water inspection by Amber Miller, of the Ohio EPA, at Byers Toyota located at 1599 Columbus Pike on July 24, 2009. The purpose of the inspection was to evaluate compliance with the General Storm Water Permit Associated with Construction Activities. During the inspection, the following items were noted:

Sediment and Erosion Controls:

- It appeared that the sediment and erosion controls were functioning as intended. Please be aware that the General Permit indicates that all controls must be inspected and maintained every seven days or within 24 hours of a precipitation event equal to or greater than 0.5 inches. A log of inspection must be maintained on site for the agency to review.
- Be aware the General Permit states that all barren areas which remain idle in excess of 21 days must be protected from erosion within seven days of the last earth disturbing activities. In addition, erosion protection must be implemented for all areas of final grade within seven (7) days.

Post Construction Requirements:

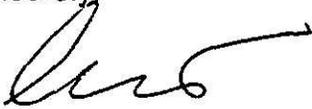

- The General Permit mandates specific water quality treatment for storm water following the completion of construction (See Attachment). Please be able to demonstrate your post construction requirements per the General Permit will be met. Please submit to my attention the water quality calculations demonstrating compliance. This information can be sent to my attention via a response letter, or to my email at harry.kallipolitis@epa.state.oh.us.

If you have any questions regarding this letter or the inspection, please do not hesitate to contact me at our Central District Office at (614) 728-3844. Follow-up inspections will be conducted to ensure the conditions of the General Permit are continuing to be met.

Sincerely,

Harry Kallipolitis
Storm Water Coordinator
Division of Surface Water
Central District Office
