Re: Walnut C&DD Facility / Fairfield County

Dear Mr. Mock:

This letter is written regarding the storm water inspection I conducted of the construction activities at Walnut C&DD, located at 8675 Lancaster-Newark Road, on April 27, 2010. Thank you for taking the time to inspect the site with me. I understand this site is currently covered under the General Storm Water Permit Associated with Construction Activities. Based on my site inspection and the conditions set forth in the General Permit, the following was noted:

Sediment and Erosion Controls:

The site was stabilized and no erosion was leaving the site. It was discussed that if storm water runoff from the concrete crushing operation contains excessive concrete dust, that additional controls will be installed, i.e., silt fence and straw bales.

It was noted that the existing check dams near the office will need new straw bales. You stated that the straw bales would be replaced the following day.

If you have any questions regarding this letter or my inspection, please do not hesitate to call me at our Central District Office at (614) 728-3851.

Sincerely,

Gregory L. Sanders
Environmental Specialist
