**Re: Johnson Transfer and Recycling / Franklin County
Industrial Storm Water Permit 4GR00451*DG**

Dear Mr. Scanlon:

This letter is written in regard to the storm water inspection that I conducted at Johnson Transfer and Recycling, aka Waste Management of Ohio, Inc., located at 1006 and 1046 Walnut Street, in Canal Winchester, Ohio. The inspection was conducted on April 6, 2010, as a follow-up to my March 9, 2010, inspection. There are several issues (listed below) that need to be corrected in order to be in compliance with your industrial storm water permit. The following items were noted during the inspection:

1. There were used truck parts on pallets without covers. Please store the truck parts inside. Please see attached picture.
2. There were trash containers being washed and the wastewater from the washing was being directed to the storm sewer. This wastewater should be directed to a sanitary sewer. Please see attached pictures.
3. The storm water basin was inspected and it was noted that a blackish-gray color was present in the basin. The west discharge was worse than the east discharge. Please see attached pictures.

As discussed during our phone conversation, the Ohio EPA will be conducting sampling of the storm water basin and its outfall. If it is determined that the discharge is impairing Tussing Ditch, it will be recommended that an individual permit replace the current industrial storm water permit. Also, if best management practices are not utilized at the facility, it will be recommended to obtain an individual permit. If you have any questions regarding this letter or my inspection, please do not hesitate to contact me at our Central District Office at 614-728-3851.

Sincerely,

Gregory L. Sanders
