**Re: Storm Water Inspection at Hard Road Improvements  
Permit Number 4GC01714\*AG**

Dear Mr. Wasosky:

This letter is written regarding the storm water inspection that I conducted at Hard Road Improvements, located in Columbus, Ohio, on March 16, 2010. The Agency understands that these construction activities are currently covered under the General Storm Water Permit. Based on the site inspection and the General Storm Water Permit, the following items must be addressed:

**Sediment and Erosion Controls:**

- The sediment and erosion controls requested concurrent with my last inspection during the month of December 2009 have been addressed. However, due to significant winter storm events, the entire site must be re-evaluated to ensure proper maintenance. This specifically applies to the erosion control measures noted at the in-field of State Route 31 and Interstate 270, and north and east of Hard Road.

If you have any question(s) regarding this letter or the inspection, please do not hesitate to contact me at our Central District Office at (614) 728-3844. Follow-up inspections will be conducted to ensure the conditions of the General Permit are continuing to be met.

Sincerely,

Harry Kallipolitis  
Storm Water Coordinator  
Division of Surface Water  
Central District Office
