**Re: Tri-Mold LLC / Pickaway County  
Industrial Storm Water Permit 4GR00419\*DG**

Dear Mr. Furniss:

This letter is written in regard to the storm water inspection that I conducted at Tri-Mold LLC, located at 200 Pittsburgh Road, in Circleville, Ohio. The inspection was conducted on March 2, 2010, to determine compliance with your industrial storm water permit. You stated that your company produces injection molded automobile parts for Honda. I did not note any discharges from your facility to a storm water drain or waters of the state and you appear to be in compliance with your permit.

The following items were noted during the inspection:

1. Your company had a storm water pollution prevention plan (SWP3) and a spill prevention plan at the facility. August Mack created these plans and they are updated annually.
2. There are resin storage silos outside but are not being used.
3. Unloading is done inside of the building. There is no outside unloading or storage.
4. There is a storm water pond that is used for fire suppression. There is no discharge outlet on the storm water pond.
5. There needs to be better housekeeping around the outside dumpster in the rear of the building. You stated that there are plans to connect to the building and put a roof over the open trash bin.
