**Re: Inspection at Clover Groff Run Stream Restoration Project Phase 1
Permit #4GCD00052*AG**

Dear Mr. Westall:

This letter is written in follow-up to a construction storm water inspection I conducted at Clover Groff Run Stream Restoration Project Phase 1 located at 3003 Frazell Road in Columbus on February 25, 2010. The purpose of the inspection was to ensure continued compliance with the General Storm Water Permit Associated with Construction Activities. During the inspection, the following items were noted:

General Maintenance:

- The majority of the site was snow covered and stable at the time of the inspection. However, I am concerned with the upcoming snow melt. Please ensure all controls are inspected and maintained following the snow melt.

Barren Areas: 21 Day Rule:

- Be aware the General Permit states that all barren areas which remain idle in excess of 21 days must be protected from erosion within seven days of the last earth disturbing activities (See Figures 1 and 2). In addition, erosion protection must be implemented for all areas of final grade within seven (7) days.

If you have any questions regarding this letter or the inspection, please do not hesitate to contact me at our Central District Office at (614) 728-3844. Follow-up inspections will be conducted to ensure the conditions of the General Permit are continuing to be met.

Sincerely,

Harry Kallipolitis
Storm Water Coordinator
Division of Surface Water
Central District Office
