**Re: Central Aluminum Company / Franklin County
Industrial Storm Water Permit 4GR00344*DG**

Dear Mr. Gilbert:

This letter is written in regard to the storm water inspection that I conducted at Central Aluminum Company, located at 2045 Broehm Road, in Columbus, Ohio. The inspection was conducted on February 12, 2010, to determine compliance with your industrial storm water permit. You stated that you company produces aluminum extrusions. I did not note any discharges from your facility to a storm water drain or waters of the state.

The following items were noted during the inspection:

1. The only outside area that could be a cause of concern is the roll-off dumpster located near the southwest corner of the building. This roll-off was uncovered and had empty drums stored in the roll-off. You stated that the drums were heated and that any chemicals had been burned off. Please be aware that one drum did not appear to be heated. Drums that may leak oil or other pollutants shall not be stored outside in dumpsters that are uncovered or that may leak. Please see attached pictures.
2. Your company has a storm water pollution prevention plan and a spill prevention, control and countermeasure plan.

If you have any questions regarding this letter or my inspection, please do not hesitate to contact me at our Central District Office at 614-728-3851.

Sincerely,

Gregory L. Sanders
