**Re: Quality Products, Inc. / Franklin County  
Industrial Storm Water Permit 4GR00439\*AG**

Dear Mr. Stratton:

This letter is written in regard to the storm water inspection that I conducted at Quality Products Inc., located at 2222 South Third Street, in Columbus, Ohio. The inspection was conducted on October 19, 2010, to determine compliance with your industrial storm water permit. You stated that your company does metal fabrication for the airline industry. Your company appeared to be in compliance with its industrial storm water permit. The following items were noted during the inspection:

1. The outside dumpster that is used to stored metal is under a canopy. No leaking was observed from this dumpster.
2. There were several garbage dumpsters that were located outside that did not have lids on the containers. There were no leaking or staining from these dumpsters, but it is recommended to have lids or covers for these dumpsters.
3. The area around the baghouse filter needed better housekeeping. There was a lot of sand on the ground near the baghouse filter. This filter was located near a storm water drain. Please remove the sand from the ground. It is also recommended to use a skirt to enclose the filter discharge into the dumpster. Please see attached pictures.
4. It did not appear that there was a spill kit near the loading/unloading ramp. Please place a spill kit near the ramp.
5. Please remember to update your spill prevention plans and storm water pollution plans annually or when there are production changes at the facility.

Ted Strickland, Governor  
Lee Fisher, Lieutenant Governor  
Chris Korfeski, Director

Karl Stratton, Plant Manager
