**Re: Construction Storm Water Inspection at Pandora Grain Supply Inc
Pickaway County
Permit Number: 4GC03372*AG**

Dear Mr. Thomas:

This letter is written regarding a storm water inspection conducted by Stephen Riley of the Ohio EPA, at the Pandora Grain Supply Incorporated located at 3014 Duval Road Lockbourne, Ohio, on October 15, 2010. The purpose of the inspection was to evaluate compliance with the General Storm Water Permit Associated with Construction Activities. During the inspection, I noted the following issues associated with construction activities at this site:

Sediment and Erosion Control:

- During the inspection, it was observed there are several stockpiles that need to be seeded and mulched. Be aware the General Permit states that all barren areas which remain idle in excess of 21 days must be protected from erosion within seven days of the last earth disturbing activities. In addition, erosion protection must be implemented for all areas of final grade within seven (7) days.
- Please be aware, erosion protection must be provided for all areas of final grade.
- Please be aware measures are expected to ensure all barren areas are properly protected in preparation for the upcoming winter months. In the event earth disturbing activities extend beyond an effective growing season, alternate erosion protection is expected. This would include but not limited to a crimped straw mulch cover.

If you have any questions regarding this letter or the inspection, please do not hesitate to contact me at our Central District Office at 614-728-3844 or email at harry.kallipolitis@epa.state.oh.us.

Sincerely,

Harry Kallipolitis
