**Re: Mid West Fabricating Company / Fairfield County
Industrial Storm Water Permit 4GR00170*DG**

Dear Mr. Timmons:

This letter is written in regard to the storm water inspection that I conducted at Mid West Fabricating Company, located at 313 North Johns Street, in Amanda, Ohio. The inspection was conducted on October 12, 2010, to determine compliance with your industrial storm water permit. You stated that your company does metal fabrication. Your company appeared to be in compliance with its industrial storm water permit. The following items were noted during the inspection:

1. Your company is ISO 14001 certified.
2. There were no final materials stored outside. Raw materials, coils of steel, were stored outside. No issues noted with the stored raw material.
3. Dumpsters that were outside had lids on the containers and were closed. Some of the dumpsters were located under roof.
4. The oil-water separator was located in secondary containment and under roof. Cleaning of product was done under roof with a trench drain sloping to the oil-water separator.
5. I did not note any discharges from your facility to a storm water drain.

If you have any questions regarding this letter or my inspection, please do not hesitate to contact me at our Central District Office at 614-728-3851.

Sincerely,

Gregory L. Sanders
