**Re: Industrial Storm Water Inspection at Henderson Trucking Inc.
Delaware County
Permit No: 4GR00481*DG**

Dear Ms. Pogel:

This letter is written in follow-up to an industrial storm water inspection I conducted at Henderson Trucking Inc located at 124 Henderson Court Delaware, Ohio on September 13, 2010. The purpose of the inspection was to evaluate compliance with the General Storm Water Permit Associated with Industrial Activities. During the inspection, the following items were noted:

Used Oil Storage:

- I noted used oil storage located at the rear of the facility. It was evident small leaks were spilling onto the ground associated with this staging area. Best management practices are expected to minimize storm water pollution associated with this storage area. This would include but not limited to areas of secondary containment in addition to completely covered and contained storage areas.

Fueling Area:

- Based on our conversation conducted on September 14, 2010, you indicated the large diesel tank was double walled. In addition you indicated that a cover was to be implemented in order to minimize the exposure to storm water. I would recommend the use of contained fueling pads to minimize the potential of storm water contamination associated with leaks/spills.

Mobile Power Washing:

- During the inspection, I noted what appeared to be an external washing station. Please understand wash water associated with mobile power operations is considered a processed waste water and not authorized for release. I recommend the utilization of local car washes facilities to ensure proper disposal of waste water associated with mobile power washing operations.
