**Re: Notice of Termination Inspection at Hard Road Improvements
Franklin County
Permit Number 4GC01714*AG**

Dear Mr. Jones:

This letter is written in follow-up to a construction storm water inspection conducted by Stephen Riley of Ohio EPA at Hard Road Improvements located in Columbus, Ohio on September 14, 2010. The purpose of the inspection was to evaluate compliance with the General Storm Water Permit Associated with Construction Activities. It appeared during the inspection that construction activity is completed for this site. A Notice of Termination will be required provided the following requirements are met:

Sediment and Erosion Control:

- The equipment storage area adjacent to 315 has a silt fence in disrepair. Please repair and maintain this fence until the area has been restored to its original condition prior to construction.
- Vegetation must be established sufficient to control erosion which is measured by a minimum vegetative density of 70%.
- A Notice of Termination (NOT) must be submitted once the post construction requirements are verified. The NOT form and filing instructions can be found at:
<http://www.epa.state.oh.us/dsw/storm/stormform.aspx>.

If you have any questions regarding this letter or my inspection, please do not hesitate to contact me at our Central District Office at 614-728-3844 or email at harry.kallipolitis@epa.state.oh.us.

Sincerely,

Harry Kallipolitis
Storm Water Coordinator
