**Re: Storm Water Inspection at Delaware Health Village Phase I
Permit #4GC02678*AG**

Dear Ms. Lewis:

This letter is written in follow-up to a construction storm water inspection by Amber Miller and Rachelle Howe, of the Ohio EPA, at Delaware Health Village Phase I located East of Glenn Parkway in Delaware County on September 17, 2009. The purpose of the inspection was to ensure continued compliance with the General Storm Water Permit Associated with Construction Activities. During the inspection, the following items were noted:

Sediment and Erosion Controls:

- The silt fence near the stream requires repair or reinstallation to provide adequate protection against sediment entering the stream (See Photo Figure 1).
- Be aware the General Permit states that all barren areas which remain idle in excess of 21 days must be protected from erosion within seven days of the last earth disturbing activities. In addition, erosion protection must be implemented for all areas of final grade within seven (7) days. This is especially important for the area near the stream (See Photo Figure 2).

If you have any questions regarding this letter or the inspection, please do not hesitate to contact me at our Central District Office at (614) 728-3844. Follow-up inspections will be conducted to ensure the conditions of the General Permit are continuing to be met.

Sincerely,

Harry Kallipolitis
Storm Water Coordinator
Division of Surface Water
Central District Office
