**Re: Storm Water Inspection at Clover Groff Run Stream Restoration Project
Permit #4GCD00052*AG**

Dear Mr. Westall:

This letter is written in follow-up to a construction storm water inspection I conducted at Clover Groff Run Stream Restoration Project located in Reynoldsburg, Ohio on September 22, 2009. The purpose of the inspection was to evaluate compliance with the General Storm Water Permit Associated with Construction Activities. During the inspection, I noted the following:

Sediment and Erosion Controls

- It appears that the majority of the earth disturbing activities are currently contained within their own excavation. In the event that positive offsite drainage is established alternate controls are expected.
- I noted extensive seeding and mulching operations for the barren and idle areas associated with this site. Please continue to ensure that all barren and idle areas will be adequately protected from erosion in preparation for the upcoming winter months.

If you have any question regarding this letter or the inspection, please do not hesitate to contact me at our Central District Office at (614) 728-3844. A follow-up inspection will be conducted to ensure the conditions of the General Permit are met.

Sincerely,

For HK
