Re: BSS Waste Facility / Fairfield County

Dear Mr. Harper:

This letter is written regarding the storm water inspection I conducted of the construction activities of the BSS Waste Facility, located near the intersection of Ruble Park Drive and Whiley Road, on April 26, 2011. I understand this site is currently covered under the General Storm Water Permit Associated with Construction Activities. Based on my site inspection and the conditions set forth in the General Permit, the following items must be addressed:

A few sections of silt fence located in the northeast and northwest corners of the site were in need of repair. Please see attached pictures.

Part of the project site was barren and it appeared that several areas were at or near final grade and were not stabilized. Please see attached pictures. Please be aware the General Permit mandates specific permanent and temporary stabilization requirements. All disturbed areas which remain idle in excess of 21 days must be protected from erosion within seven days of the last earth disturbing activities. All areas of final grade must be protected within seven days. All earth disturbing activities should be clearly logged in your inspection reports to ensure the 21 day / seven day requirement is not violated.

If you have any questions regarding this letter or my inspection, please do not hesitate to call me at our Central District Office at (614) 728-3851.

Sincerely,

Gregory L. Sanders
