Re: Westerman Nuclear Facility / Fairfield County

Dear Mr. Wolfe:

This letter is written regarding the storm water inspection that I conducted on April 26, 2011, at the Westerman Nuclear Facility, located at 1395 Webb Summit Road, in Bremen, Ohio. There was no construction activity at the time of my site inspection. Based on the site inspection and the General Storm Water Permit, the following items were noted during the inspection.

Sediment and Erosion Controls:

Most of the site was stabilized and no erosion was leaving the site. There were a few barren areas at the site that will need to be stabilized. Please be aware that the General Permit mandates that all barren areas which remain idle areas in excess of 21 days be protected from erosion (i.e., seed and mulch).

If you have any questions regarding this letter or my inspection, please do not hesitate to call me at our Central District Office at (614) 728-3851.

Sincerely,

Gregory L. Sanders
