**Re: Pandora Grain Supply, Pickaway County
General Storm Water Permit #4GC03372*AG**

Dear Mr. Luginbill:

This letter is written in follow-up to a construction storm water inspection that I conducted at the Pandora Grain Supply located at 3014 Duvall Road, in Lockbourne, Ohio, on April 8, 2011. The purpose of the inspection was to evaluate compliance with the General Storm Water Permit Associated with Construction Activities. During the inspection, I noted the following:

Sediment and Erosion Controls:

It appeared during the inspection that construction activity is idle at this site. Please install additional erosion controls in the northwest corner of your property to prevent sediment eroding off-site. Additional erosion controls could be silt fence, gravel check dams and straw bales. Also, please stabilize any barren areas. Please see attached pictures.

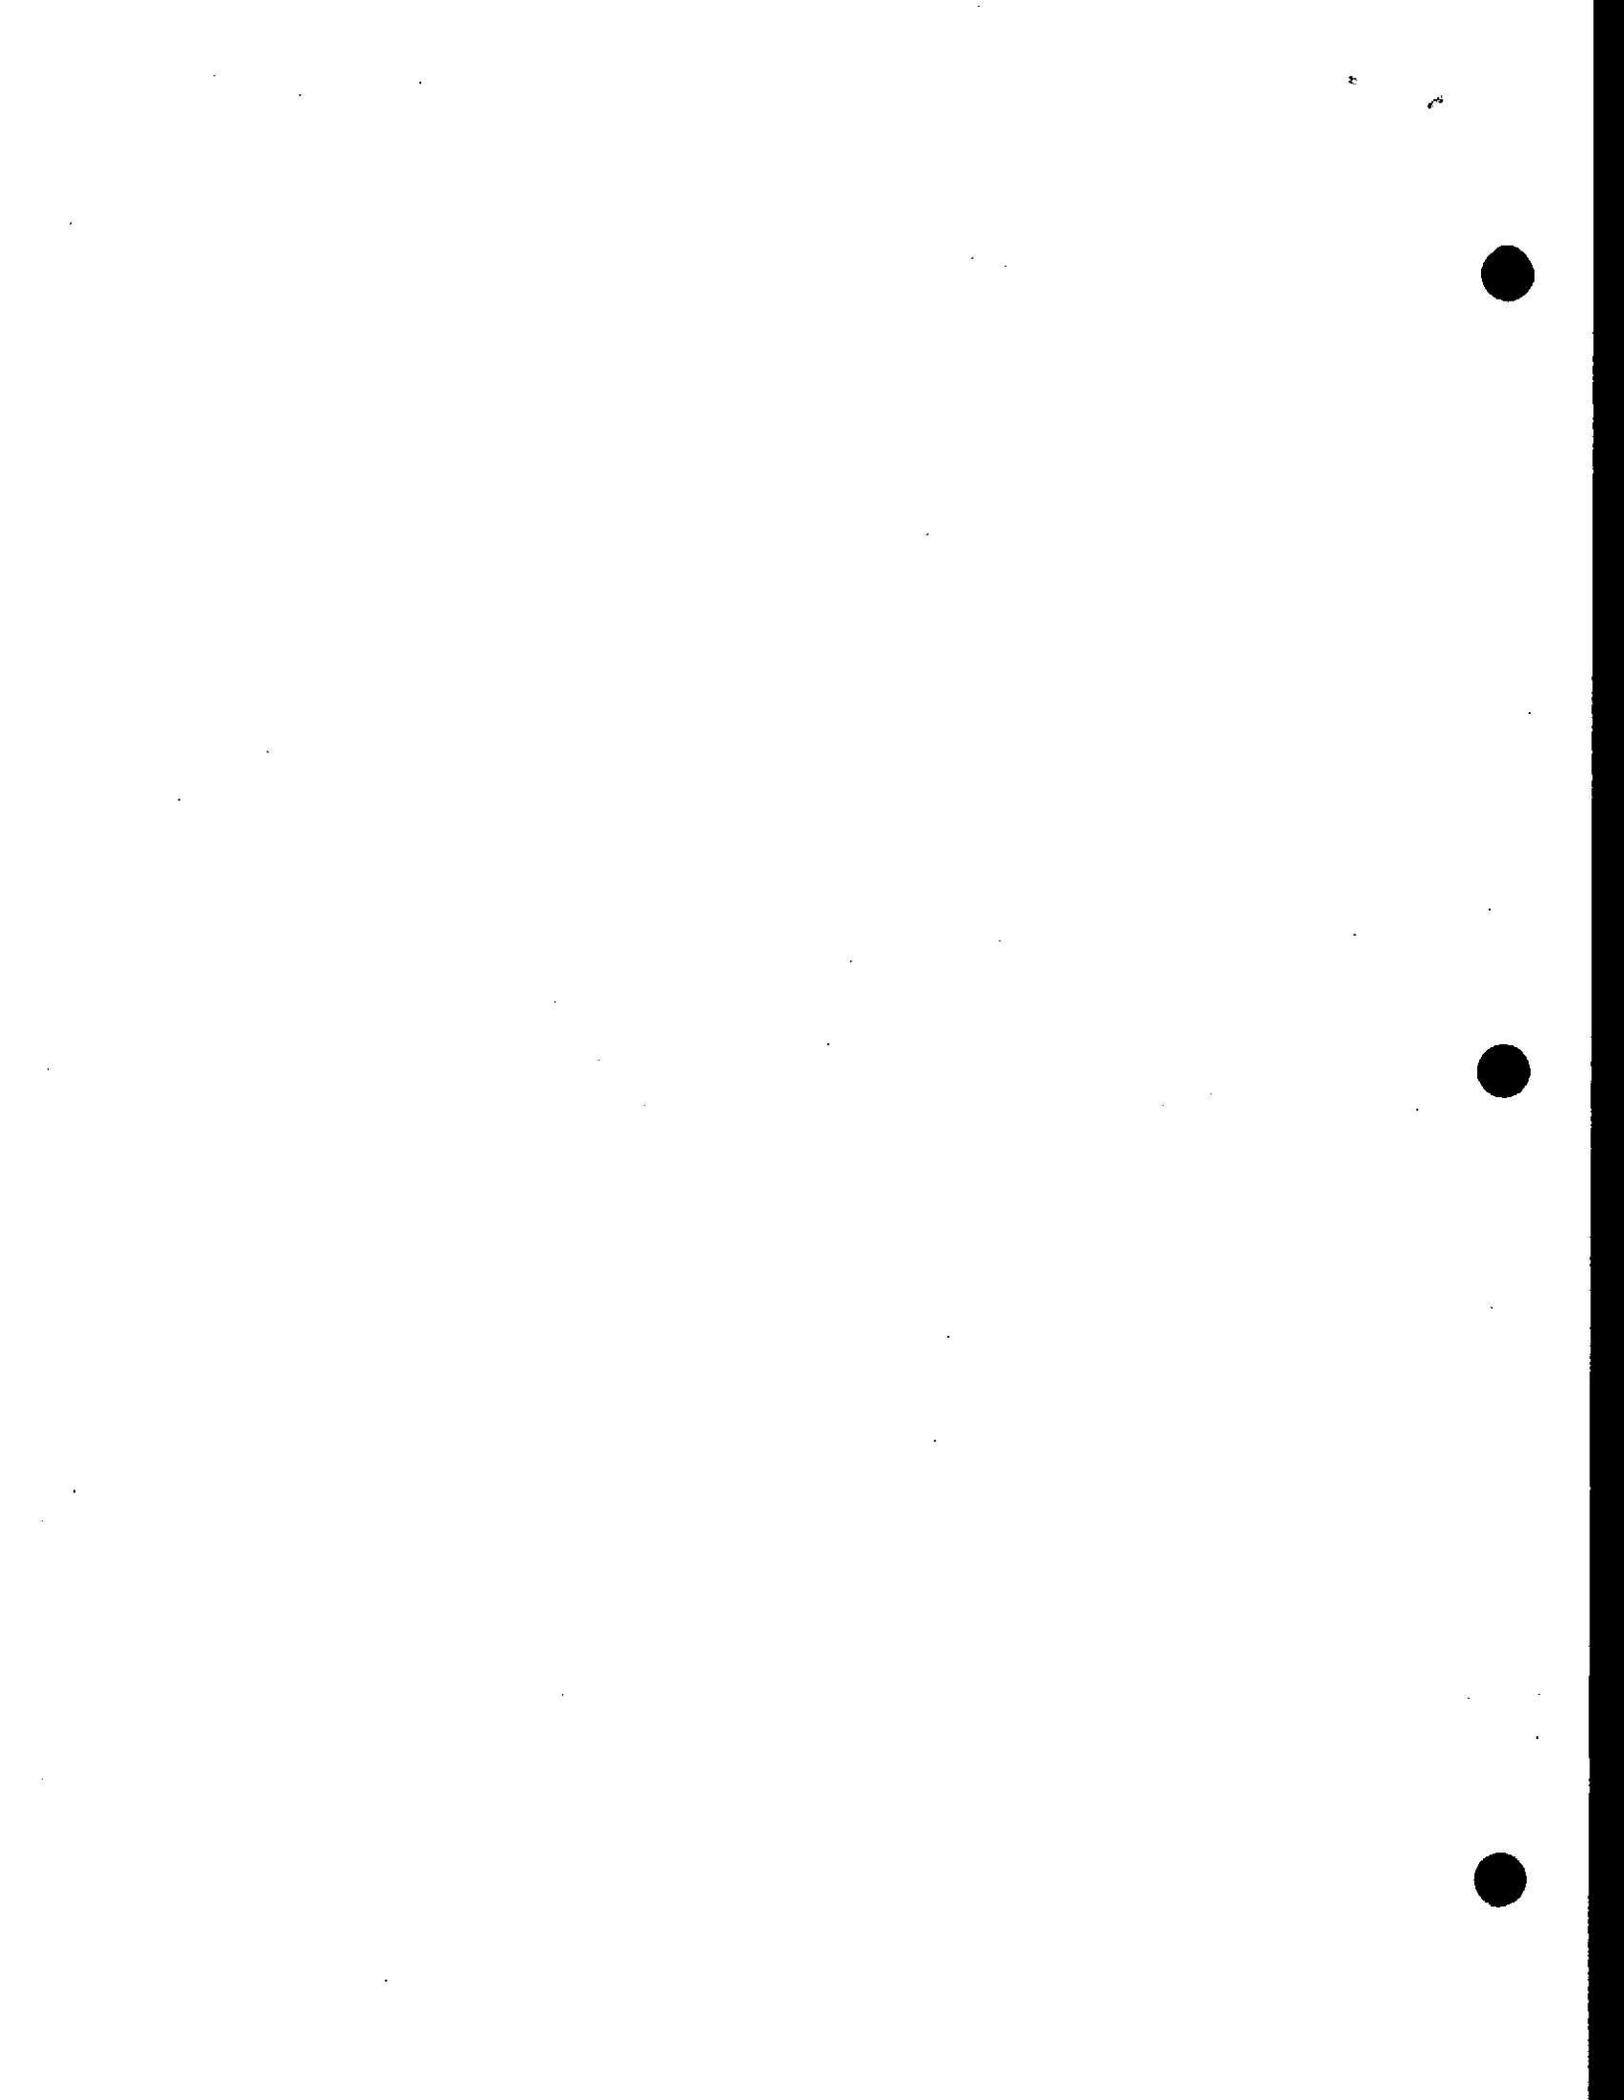

If you have any questions regarding this letter or the inspection, please do not hesitate to contact me at our Central District Office at (614) 728-3851.

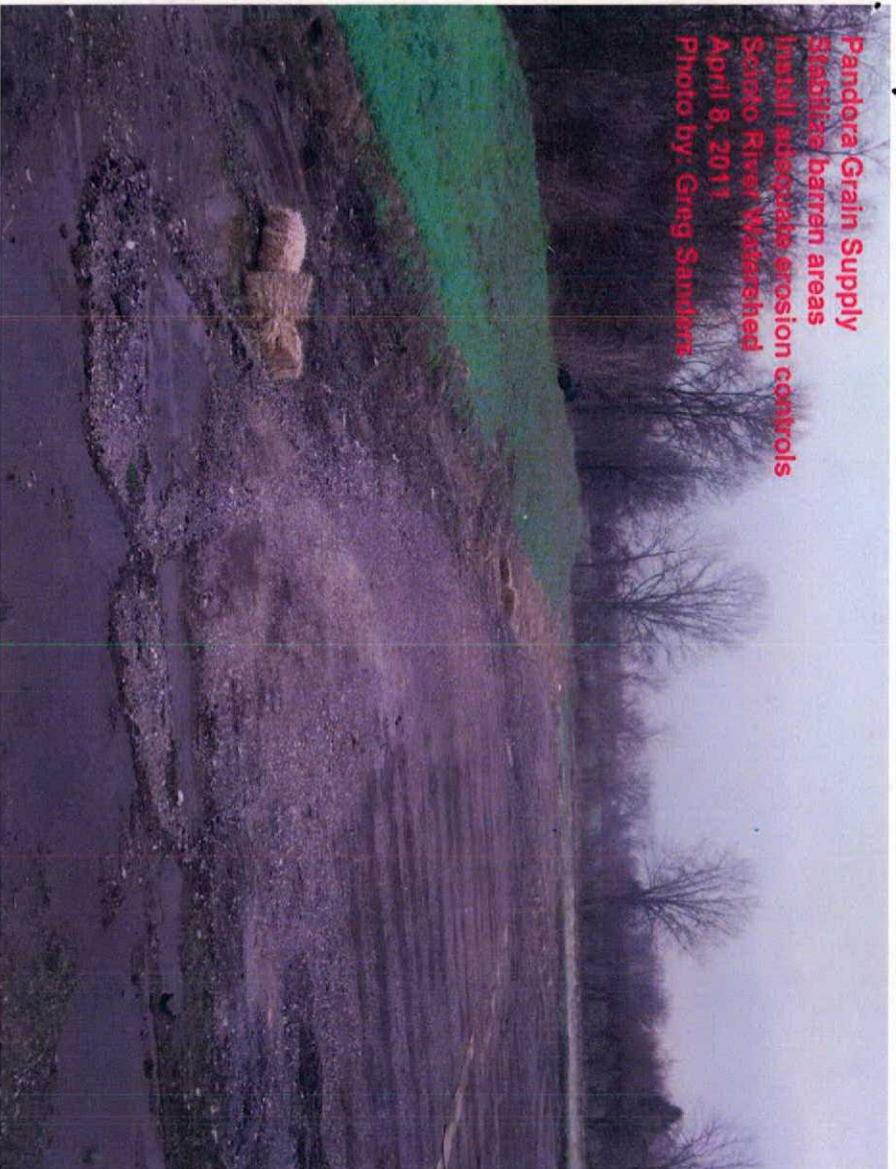

Sincerely,

Gregory L. Sanders
Environmental Specialist
Division of Surface Water
Central District Office
