**Re: Construction Storm Water Inspection at Franklin County Sanitary Landfill
Franklin County
Permit Number 4GC03316*AG**

Dear Mr. Ashton:

This letter is written in follow-up to a construction storm water inspection conducted by Stephen Riley of Ohio EPA at Franklin County Sanitary Landfill located at 3851 London Groveport Road, Grove City, Ohio on August 12, 2010. The purpose of the inspection was to evaluate compliance with the General Storm Water Permit Associated with Construction Activities. The following was noted:

- During the site investigation, it was found that the dewatering activities on the southeast side of the complex resulted in turbid discharges to waters of the state (Figure 1). Be aware this is a direct violation of ORC 6111.04. Measures must be implemented immediately to ensure there are no further turbid discharges resulting from your dewatering activities.
- The sediment controls implemented on this site will require maintenance or reinstallation to ensure a proper functioning condition. This general permit states that all sediment controls will be inspected and maintained every seven days or within 24 hours of a precipitation event equal to or greater than 0.5 inches. A log of inspection must be maintained on site for the agency to review.

If you have any questions regarding this letter or my inspection, please do not hesitate to contact me at our Central District Office at 614-728-3844 or email at harry.kallipolitis@epa.state.oh.us.

Sincerely,

Harry Kallipolitis
Storm Water Coordinator
