**Re: Storm Water Inspection at Toll Gate Road/Refugee Road Improvements
Fairfield County
Permit No: 4GC02973*AG**

Dear Mr. Utterback:

This letter is written in follow-up to a construction storm water inspection by Stephen Riley & Vinod Tujalpuram, of the Ohio EPA, conducted at Improvements for Canal Pointe LLC located at Intersection of Toll Gate Road & Refugee Road, on July 19, 2010. The purpose of the inspection was to evaluate compliance with the General Storm Water Permit Associated with Construction Activities. During the inspection, the following items were noted:

It appeared during the inspection that construction activity is completed for this site. Vegetation must be established sufficient to control erosion which is measured by a minimum vegetative density of 70%.

- It appears as though some areas lack proper seeding and thus do not possess the necessary 70% vegetative density (Figure 1). Please reseed the trouble areas within seven (7) days upon receipt of this letter.
- The General Storm Water Permit requires specific post construction water quality treatment for all sites. Guidance regarding the post construction mandates can be found at:
<http://www.epa.state.oh.us/dsw/storm/CGPPCQA.aspx>. Please submit to my attention (email preferred at harry.kallipolitis@epa.state.oh.us) which practice will be installed at this site to ensure compliance with the General Permit. Please include all design criteria with your submittal.
- A Notice of Termination (NOT) must be submitted once the post construction requirements are verified. The NOT form and filing instructions can be found at:
<http://www.epa.state.oh.us/dsw/storm/stormform.aspx>.
