**Re: Construction Storm Water Inspection at East Orange Road Bike Path Project  
Permit Number: 4GC03223\*AG**

Dear Mr. Overturf:

This letter is written regarding the storm water inspection; I conducted at **East Orange Road Bike Path Project** located East Orange Road (DEL-TR-114) between Abbey Knoll Drive & Bale Lewis Center, Ohio on July 7, 2010. The Agency understands that these construction activities are currently covered under the General Storm Water Permit Associated with Construction Activities. Based on the site inspection and the General Storm Water Permit, the following items were noted;

**Sediment and Erosion Control:**

- Please maintain the current perimeter controls. Steep slopes adjacent to the creek on the south end of the road must be protected from erosion with a temporary mulch cover.
- The silt fence in the deep slope areas are insufficient to control and failed to meet the minimum conditions of the General Storm Water Permit.
- The addition of temporary stabilization will act not only to protect the slopes from erosion, but will minimize the sediment transport into the nearby receiving stream.

If you have any questions regarding this letter or the inspection, please do not hesitate to call me at our Central District Office at (614) 728-3844 or email at [harry.kallipolitis@epa.state.oh.us](mailto:harry.kallipolitis@epa.state.oh.us). In addition, please provide a written response to the action items addressed above within ten days from receipt of this letter. A follow up inspection will be conducted to ensure the minimum conditions of the General Permit have been met.

Sincerely,

Harry Kallipolitis  
Storm Water Coordinator  
Division of Surface Water
