**Re: Notice of Violation
Circleville First Moving Forward Church, Pickaway County**

Dear Mr. Holbrook:

This letter is written regarding the storm water inspection that I conducted at the Circleville First Moving Forward Church located at 9563 State Route 22, in Stoutsville, Ohio. The inspection was conducted on August 26, 2011. I understand that these construction activities are currently covered under the General Storm Water Permit Associated with Construction Activities. Please consider this a formal notice of violation. Based on my site inspection and the General Storm Water Permit, the following items must be addressed.

Sediment and Erosion Controls:

1. The rear of the site including the stockpile was still barren. There was a limited amount of silt fence installed to prevent erosion of sediment from the site. There are large rills and gullies forming which further allow the site to erode. Please install and maintain erosion controls and stabilize the barren areas. Please see attached pictures.
2. As stated previously, please install rock, straw bales and silt fence as check dams in the ditch along the walking trail. This will slow the velocity of the storm water. If the check dams and silt fence do not adequately contain the storm water, then it is recommended to utilize a berm to direct the sediment-laden storm water to the sediment pond. Please see attached pictures.

If you have any questions or comments regarding my inspection or comment letter, please call me at 614.728.3851.

Sincerely,

Gregory L. Sanders
