**Re: Diley Towne Center / Fairfield County**

Dear Mr. DiCesare:

This letter is written regarding a storm water inspection that I conducted on July 1, 2010, at Diley Towne Center located near the intersection of Windmill Drive and S.R. 256 in Pickerington, Ohio. The Agency understands that these construction activities are currently covered under the General Storm Water Permit Associated with Construction Activities. Based on the site inspection and the General Storm Water Permit, the following was observed at the site:

**Sediment and Erosion Controls:**

- There was no active construction at the site during the inspection. There did not appear to be any erosion leaving the site and all barren areas were stabilized. You appeared to be in compliance with your General Storm Water Permit.

If you have any questions regarding this letter or the inspection, please do not hesitate to contact me at our Central District Office at (614) 728-3851. Follow-up inspections will be conducted to ensure the conditions of the General Permit are continuing to be met.

Sincerely,

Gregory L. Sanders  
Environmental Specialist  
Division of Surface Water
