**Re: Construction Storm Water Inspection at Morse Road Reynoldsburg-
New Albany Road Round-About / Franklin County
Permit Number 4GC03221*AG**

Dear Mr. Bashore:

This letter is written in follow-up to a construction storm water inspection I conducted of the waste/borrow area associated with the construction project on June 30, 2010. The purpose of the inspection was to evaluate compliance with the General Storm Water Permit Associated with Construction Activities. During the inspection, I met with Paul Sells, resident, Jefferson Township, and Franklin County Engineers' On-Site Manager.

Complaint Investigation:

- During the Investigation I had the opportunity to evaluate a borrow/waste area associated with the site. Mr. Sells, a resident, expressed concerns with the drainage associated with the placement of fill associated with this waste area. At this time, I am formally requesting you investigate Mr. Sells' concerns and determine if there is a potential alternative to address his concerns

Sediment and Erosion Control:

- I had the opportunity to evaluate the centralized sediment basin on the eastern end of the project. This basin has been filled with number two stone and is viewed as an alternative to the requirements of the General Storm Water Permit. Please ensure that all pumping activities associated with this impoundment do not result in turbid discharges to waters of the state.

Ted Strickland, Governor
Lee Fisher, Lieutenant Governor
Chris Korleski, Director
