Re: Harrisburg Water & Wastewater System / Franklin County

Dear Ms. Peterson:

This letter is regarding the storm water inspection that I conducted at the construction activities of the Village of Harrisburg's water and wastewater system, located throughout the Village of Harrisburg, on June 23, 2010. The Ohio EPA has received and approved this site for coverage under the General Storm Water Permit associated with Construction Activities. Ohio EPA's Storm Water Staff will be conducting future storm water inspections to ensure compliance with the General Permit.

Sediment and Erosion Controls:

- It was noted that there were several storm drains that did not have dandy bag covers on them to protect sediment from discharging to the drains. One such drain is located at Lincoln and Chenoweth Streets. Please see attached picture.
- Please be aware the General Permit states that all barren areas which remain idle in excess of 21 days must be protected from erosion within seven days of the last earth disturbing activities. In addition, erosion protection must be implemented for all areas of final grade within seven (7) days. There were a few areas that needed to be stabilized. Please see attached picture.

If you have any questions regarding this letter or the inspection, please do not hesitate to contact me at our Central District Office at (614) 728-3851.

Sincerely,

Gregory L. Sanders
