**Re: Mary Virginia Crites – Hannan Park (2), Pickaway County**

To Whom It May Concern:

This letter is written regarding the storm water inspection that I conducted at the Mary Virginia Crites – Hannan Park (2) in Pickaway County, on June 9, 2010. I understand that these construction activities are currently covered under the General Storm Water Permit Associated with Construction Activities. Based on my site inspection and the General Storm Water Permit, the following items must be addressed.

**Sediment and Erosion Controls**

1. I noted active construction had taken place recently during my inspection. There were several barren areas at the site. These barren areas need to have silt fence around the perimeter. Also, all barren areas at final grade need to be stabilized. Please see attached pictures.
2. Please be aware the General Permit states that all barren areas which remain idle in excess of 21 days must be protected from erosion within 7 days of the last earth disturbing activities. In addition, erosion protection must be implemented for all areas of final grade within 7 days.

If you have any questions regarding this letter or my inspection, please do not hesitate to call me at our Central District Office at (614) 728-3851. A follow-up inspection will be conducted to ensure the minimum conditions of the General Permit have been met.

Sincerely,

Gregory L. Sanders  
Environmental Specialist  
Division of Surface Water  
Central District Office
