Re: Storm Water Inspections at Target at Reynoldsburg

Dear Storm Water Manager:

This letter is written in follow-up to a series of storm water inspections I conducted of the construction activities associated with the Target at Reynoldsburg located in Reynoldsburg, Ohio, on April 21, 2010.. The Agency understands this construction site was currently covered under the General Storm Water Permit Associated with Construction Activities. The purpose of the inspections was to evaluate the stream bank stabilization project associated with Blacklick Creek and the storm water management pond

The stream bank stabilization of Blacklick creek was stable on this date. Please continue to monitor this project to ensure continued success.

It was my understanding that additional plantings were to be incorporated in the storm water management pond. Please advise regarding the status of the proposed plantings.

If you have any questions regarding this letter or my inspection, please do not hesitate to contact me at our Central District Office at 614-728-3844. Follow-up inspections will be conducted to ensure the minimum conditions of the General Permit have been met.

Sincerely,

Harry Kallipolitis
Storm Water Coordinator
Division of Surface Water
