Re: Michaela Subdivision / Franklin County

Dear Mr. Bigler:

This letter is written regarding the storm water inspection I conducted, on July 8, 2009, of the construction activities at your property located at 6188 Olentangy River Road. The Agency understands that these construction activities are currently covered under the General Storm Water Permit Associated with Construction Activities. Based on the site inspection and the General Storm Water Permit, the following was observed at the site:

Sediment and Erosion Controls:

Perimeter silt fencing was installed around the property and along the stream per the last inspection letter. The silt fence must be inspected weekly or after a significant rain event. Please see attached pictures.

Please be aware that the General Permit mandates that all barren areas which remain idle areas in excess of 21 days be protected from erosion (i.e., seed and straw), within seven days from the last construction activity.

If you have any questions regarding this letter or my inspection, please do not hesitate to call me at our Central District Office at (614) 728-3851.

Sincerely,

Gregory L. Sanders
